# 1 IWeb2000 Basics

IWEB2000 is a featured State Immunization Information System. It provides patient immunization resource management and administration tools that work together to help graphically perform patient immunization management tasks.

Using IWEB2000, patient immunization data can now be visually accessed and presented in powerful new ways via the Internet. IWEB2000 includes customer-built forms, reports, exports, and a graphical user interface that allows a graphic presentation of patient vaccination records. The application allows authorized users to conveniently search for patients in the central registry, add or modify patient and vaccination records, facilities, physicians, vaccine lot numbers, create reports, run reminder/recall, and send exports to the central registry.

This manual introduces IWEB2000 and its functionality. The design focuses on features of IWEB2000 to help convey how the application works. The concepts discussed in each chapter are to introduce the user to the program.

## **1.1 IWeb Data Rules and Tips**

Certain fields take either numbers or letters. Some fields, like the address, may take both. Users must enter information into each field in the proper format. For example, if the user tries to enter letters in the Social Security field, they will get an error message in the top of the screen that tells them invalid characters in this field. Follow the guidelines, as shown below, to simplify using the application.

### **Capitalization**

It is not necessary to use the Shift key to capitalize the first letter in data entry; the Web Application automatically capitalizes all letters when records are updated.

### **Dates**

The date fields are formatted with the forward slash "/" symbol between the month, day, and year. The forward slash will automatically be entered into the field when adding dates.

Enter dates as month/day/year (mm/dd/yyyy), (mm/dd/yy), (mmddyyyy), or (mmddyy).

### **Social Security Number**

The social security number (SSN) fields are formatted with the dash "-" symbol. The dash will automatically be entered into the field when adding the SSN.

Enter Social Security Numbers (SSN) as ###-##-####, or #####-##-##.

### **Phone or Fax Number**

The phone and fax number fields are formatted with the parenthesis "(" for the area code and the dash "-" symbol between the prefix and the last four numbers. These symbols will automatically be entered when adding the phone and fax numbers.

Enter phone numbers as (###)###-####, or #####-###-##.

### **Zip Codes**

The zip code fields are formatted with the dash "-" symbol. The dash will automatically be entered into the field when adding zip codes with the zip plus four.

Enter zip codes as #####, or #####-####. If this data is entered incorrectly, an error message will immediately open to inform you of this error.

### **Tab Key**

All the fields in the web application have a "tab" order. This means that when the cursor is in a field, by pressing the "Tab" key, it will move the cursor to the next field. Alternatively, by pressing "Alt + Tab", the cursor will move backwards through the "tab" order. This is helpful when entering data because the user does not have to constantly use the mouse.

### **Enter Key**

The "Enter" key on the keyboard is used the same throughout the web application. By pressing the "Enter" key, the application executes the function associated with the

particular page that is currently active. For example, if the user is in the Patient Search screen, the "Enter" key will execute the search function.

Exception to this is if a button is highlighted by using the "Tab" key function, pressing the "Enter" key will execute whichever button is highlighted.

### **Backspace Key**

The "Backspace" key on the keyboard is used the same throughout the web application. By pressing the "Backspace" key, the application returns to the prior screen. For example, if the user performs a search and the "Search Results" screen does not display the information the user wanted, they could return to the search screen by pressing the "Backspace" key.

### **Cut, Copy, & Paste**

Many times, there is certain data that needs to be entered more than once. Here are a couple of ways to cut, copy, or paste data:

**Note:** *Not all functions work with every screen, or every computer. Try using different combinations to get the desired effect.*

- Cut (Item must be highlighted first) =
  - Control + x
  - Right click on mouse, select "Cut" from the menu
  - Select "Edit" from the toolbar then select "Cut" from the menu
  - Shift + Delete
- Copy (Item must be highlighted first) =
  - Control + c
  - Right click on mouse, select "Copy" from the menu
  - Select "Edit" from the toolbar then select "Copy" from the menu
  - Control + Insert
- Paste =
  - Control + v
  - Right click on mouse, select "Paste" from the menu
  - Select "Edit" from the toolbar then select "Paste" from the menu
  - Shift + Insert

### **Drop-down Menus**

Drop-down menus are usually setup with pre-determined or hard-coded data for users to select. The normal use would be to click on the drop-down "arrow" to open the list, and then scroll through the list, looking for the item.

A shortcut for finding the needed value from the drop-down menu is to open the list and then press the letter on the keyboard for which the word begins. If the item is not found the first time the letter is pressed, press the same letter repeatedly until the desired item appears. This will work whether the list is alphabetical or not.

## **Checkboxes**

A keyboard shortcut for using the checkbox is to "tab" to the checkbox, then press the spacebar. This will "check" or "uncheck" the highlighted box.

## **Radio Buttons**

A keyboard shortcut for using the radio buttons is to "tab" to the desired set of radio buttons. Once the desired set of radio buttons are reached, use the directional "arrow" buttons on the keyboard to move the highlighted radio button from one to the next.

## **Scroll Mouse**

If users are using a scroll mouse, the scrolling wheel can be used a couple of different ways if programmed correctly.

- Scroll through selected dropdown lists
- Scroll the current web page

## 1.2 IWeb Menu - Login

To start using the web application open Internet Explorer and enter the web address to the immunization web site established for your state, for example:

<http://www.immunizationregistries.com/>.

Along the left side of the screen, the main menu appears. Available options will appear in bold. Until logged in, the only active link will be the "Login" link, which is shown in bold print. Click on the "Login" link to get to the login page.

Enter the user name and password assigned to you by the registry administrator. Once logged in, new user options will become available. Depending on the access level granted to the user, different items will be available.

Once logged in, the user can begin using the web application. If the user has "client" user rights, it is important to enter information using the Toolbox and Personal Settings first. The Toolbox allows the user to enter important facility information such as active lot numbers and vaccinators.

The Personal Settings menu allows the user to set default values that can be used as shortcuts during data entry. For more information about the Toolbox, refer to Section 2. For more information about Personal Settings, refer to section 3.

If you have "view" rights only, skip Section 2 and 3 and move to Section 4. From here, the search information is the same for "view" or "client" rights. If a user has "view" rights only, the application will not allow edits to returned information.

While any record is in edit mode, the patient's record will be locked from any other user accessing it. The user must "Cancel Edits" or "Logout". If the user fails to perform one of these steps before closing the application, the record will be locked until the session is timed out.

## 2 Setting Up The Toolbox

### 2.1 About the Toolbox

The Toolbox is used to maintain a list of current vaccine lot numbers and vaccinators for a facility. All of the values should be kept up to date. Reports can be generated for all of the variables entered.

First time users of the web application will need to enter in all the toolbox information pertaining to their facility or Immunization Record Management System (IRMS) number. The Toolbox is located in the main menu, on the left side of the web page. The specific items found in the web application toolbox include facilities (clinics), lot numbers, and physicians/vaccinators. Additionally, the detailed information that is entered is stored by IRMS number. This information can be seen or used only by personnel located at within an IRMS, depending on the access level granted to the user. If a user were reporting data to the central registry using the PCI Client Server Suite, the only data that will be available to them on the web is patient and vaccination data.

Records can only be inactivated, not deleted, once they have been entered into the Toolbox. The reason records cannot be deleted is that other records in the system reference them. To inactivate records, simply check the box titled "inactive".

**Note:** *The Facilities and Physicians/Vaccinators menu options are not available to all. If information needs to be updated pertaining to these items, contact the system administrator.*

#### 2.1.1 Automatic Ownership Blocking

In both, the Facility and Physician/Vaccinator toolbox, users now have the option to block ownership of a patient record. Ownership of a record happens when a patient's record is last updated by a certain physician/vaccinator at a certain facility.

For example, a patient may belong to Dr. Smith. If this patient goes to a vaccination clinic and receives vaccinations, typically, the record is updated and now the patient's record now looks as though it belongs to the person, or facility, that gave the vaccinations. By checking the box "Automatic Ownership Blocked", the patient will still appear to belong to Dr. Smith.

## 2.2 Toolbox Menu – Facilities

Facilities may be defined within the web application, in order to track a sub-group of patient records. For example, you may wish to identify those patients of “Pediatric Clinic”. When printing a report, you can sort all the patients located in “Pediatric Clinic”.

### 2.2.1 Adding Facilities

First time users of the application should enter all the current facility information pertaining to their organization. Any Facilities to be tracked are entered by selecting “Facilities” from the Toolbox menu. The “Facility Maintenance” screen makes it mandatory to search for a facility before adding one. Once the search is performed and the specific facility is not found, the user may choose to add one. If the facility is found, click on the arrow button located next to the clinic to do any edits, which is discussed in the following section.

Facility Maintenance						
Search/Add Facility - Search Required Before Adding						
Facility Name: <b>pediatric clinic</b>					<a href="#">Back to Search</a>	
Search Results						
Select	Facility Name	Inactive	Street	City	State	Zip
<div><div></div><div>Add A Facility</div></div>						

Click on the "Add A Facility" button. The "Facility Maintenance Add" screen will appear to enter information about the facility. The only required fields are those labeled in red. It is recommended that you enter as much information as possible to ensure complete and accurate record keeping. When finished, click "Add This Facility". You will be returned to the Facility Maintenance screen.

Facility Maintenance Add	
<b>Facility Name:</b>	PEDIATRIC CLINIC
Street:	<input type="radio"/> P.O. Box: <input type="text"/> <input type="radio"/> Physical Address: <input type="text"/>
	<input checked="" type="radio"/> Street: <input type="text"/>
City:	<input type="text"/>
State:	-select- ▼
County/Parish:	<input type="text"/> <a href="#">Click to select</a>
Zip Code:	<input type="text"/>

Email:	<input type="text"/>
Inactive:	<input type="checkbox"/>
District/Region:	<input type="text"/>
Automatic Ownership Blocked:	<input type="checkbox"/>
<div> <input type="button" value="Cancel"/> <input type="button" value="Clear"/> <input type="button" value="Add This Facility"/> </div>	
<p>To add a facility, enter your facility information above. Complete as many of the fields as possible. Required fields are indicated by <b>red</b> text.</p> <p><b>Phone Number/Fax Format:</b> 999-999-9999  <b>ZIP Code Format:</b> 99999 or 99999-9999</p>	

### 2.2.2 Editing Facilities

As with adding a facility, users must perform a search in order to view or edit a facility. Once the search has been completed, click on the arrow to the left of the facility name to enter the record.

Facility Maintenance						
Search/Add Facility - Search Required Before Adding						
Facility Name: <b>pediatric clinic</b>					<input type="button" value="Back to Search"/>	
Search Results						
Select	Facility Name	Inactive	Street	City	State	Zip
<input type="button" value="→"/>	PEDIATRIC CLINIC					
						<input type="button" value="Add A Facility"/>

After viewing the detailed facility information, click on the “Update Facility” button to edit the record.

Facility Maintenance [Detail]	
<b>Facility Name:</b>	PEDIATRIC CLINIC
Street:	P.O. Box:    Physical Address:
City:	Street:

<p>To add a facility, enter your facility information above. Complete as many of the fields as possible. Required fields are indicated by <b>red</b> text.</p> <p><b>Phone Number/Fax Format:</b> 999-999-9999  <b>ZIP Code Format:</b> 99999 or 99999-9999</p>	

## 2.3 Toolbox Menu – Physicians/Vaccinators

All active physicians/vaccinators must be entered using the Toolbox. To enter Physicians and Vaccinators into the web application, select “Physicians/Vaccinators” from the toolbox menu. Only enter the names of people who work for your organization who will be administering vaccines, not every doctor in town!

The screenshot shows the 'Physician/Vaccinator Maintenance' interface. At the top, there's a title bar and a subtitle 'Search/Add Physician or Vaccinator - Search Required Before Adding'. Below this, there are radio buttons for 'Physician', 'Vaccinator', and 'All', with 'All' selected. A checkbox labeled 'Physician/Vaccinator Last Name:' is checked, and a text input field contains 'westmoorland'. To the right of this field is a 'Search' button. Below the search field, there's a 'Facility:' label and a dropdown menu showing '-select-'. A 'Search Results' section is visible at the bottom, containing a table with headers: 'Select', 'First Name', 'Middle Name', 'Last Name', 'Suffix', 'Inactive', and 'Type'.

Select	First Name	Middle Name	Last Name	Suffix	Inactive	Type
--------	------------	-------------	-----------	--------	----------	------

### 2.3.1 Adding New Physicians/Vaccinators

The Physician/Vaccinator Maintenance screen requires a search before records can be added in an effort to reduce duplication. A screen will appear with the returned search results, if any meet the criteria. In order to add a new entry, click on the “Add a Physician/Vaccinator” button or click on “Back to Search” to conduct another search.

This screenshot shows the same 'Physician/Vaccinator Maintenance' interface after a search. The 'Search Criteria:' section now displays 'Physician/Vaccinator Last Name: westmoorland' and a 'Facility:' dropdown. A 'Back to Search' button is present. The 'Search Results' table is empty. At the bottom of the form, there is a prominent blue button labeled 'Add a Physician / Vaccinator'.

Select	First Name	Middle Name	Last Name	Suffix	Inactive	BOMEX	DO
--------	------------	-------------	-----------	--------	----------	-------	----

The only required fields are those labeled in red. It is recommended that you enter as much information as possible.

When all key information has been entered, click on the "Add This Physician/Vaccinator" button. You will be returned to the Physician Maintenance screen and the information will be saved.

Physician/Vaccinator Maintenance [Add]	
<b>First Name:</b>	<input type="text"/>
Middle Name:	<input type="text"/>
<b>Last Name:</b>	<input type="text" value="westmoorland"/>
Suffix	<input type="text" value="-none-"/>
SSN:	<input type="text"/>
BOMEX:	<input type="text"/>
DO:	<input type="text"/>
Medicaid PIN:	<input type="text"/>
Medicaid Group:	<input type="text"/>
Facility:	<input type="text" value="-select-"/>
<b>Phone Number:</b>	<input type="text"/>
Fax Number:	<input type="text"/>
Email Address:	<input type="text"/>
District/Region:	<input type="text"/>
Inactive:	<input type="checkbox"/>
Automatic Ownership Blocked:	<input type="checkbox"/>
<b>Type:</b>	<input type="radio"/> Physician <input checked="" type="radio"/> Vaccinator <input type="radio"/> Both

To add a physician, enter your physician information above. Complete as many of the fields as possible. Required fields are indicated by **red** text.

**SSN Format:** 999-99-9999  
**Phone/Fax Number Format:** 999-999-9999

### 2.3.2 Editing Physicians/Vaccinators

To edit information for a current Physician/Vaccinator in the system, a search must be performed. Selecting the facility the Physician/Vaccinator is associated with can narrow the search. Click the "Search" button. Once the search results are returned, click the arrow button located to the left of the Physician's or Vaccinator's name. A "Physician/Vaccinator Maintenance Detail" screen appears. Check the detail information to make sure this is the record you wish to edit. If so, click on the "Update Physician/Vaccinator" button.

Physician/Vaccinator Maintenance [Detail]	
<b>First Name:</b>	BRENDA
Middle Name:	
<b>Last Name:</b>	WESTMOORLAND
Suffix:	MD
SSN:	
BOMEX:	
DO:	
Medicaid PIN:	
Medicaid Group:	
Facility:	COLLEGE PARK
<b>Phone Number:</b>	(888)555-6857
Fax Number:	
Email Address:	
District/Region:	
Inactive:	
Automatic Ownership Blocked:	
<b>Type:</b>	Both Physician & Vaccinator

Update Physician / Vaccinator

Signature:

A screen will appear for you to start editing information about the Physician/Vaccinator. When the information has been entered, click on the "Update Now" button. If you wish to cancel your changes, you can select the "Cancel" button, which will return you to the "Physician/Vaccinator Maintenance" screen. If you wish to undo the changes, click the "Reset Values" button and reenter the new information.

To add a signature for the physician/vaccinator, while in edit mode, click on the "Edit" button below the signature block. Once finished writing the signature, click the "Done" button. To start the signature over, click the "Clear" button. To cancel adding a signature, click the "Cancel" button.

When finished adding the signature to the toolbox, click on the "Update Now" button. This will save any information changed in this record.

Physician/Vaccinator Maintenance [Update]

<div>Cancel Reset Values Update Now</div>	
Signature:	<div><div>Edit Clear Cancel Done</div></div>

## 2.4 Toolbox Menu - Lot Numbers

First time users should enter all of the current lot numbers in use at the facilities (clinics). Any lot numbers to be tracked can be entered by selecting "Lot Numbers" from the Toolbox menu.

The "Lot Number Maintenance screen" provides four options for searching for lot numbers. If more than one option is selected, it will narrow the search. If no options are selected, the search will return all lot numbers in the registry database associated with the user's facility.

Lot Number Maintenance							
Search/Add Lot Number - Search Required Before Adding							
<input type="checkbox"/>	Vaccine:	-select-					
<input type="checkbox"/>	Manufacturer	-select-					
<input type="checkbox"/>	Lot Number					<b>Search</b>	
<input type="checkbox"/>	Facility	-select-					
Search Results							
Select	Facility	Manufacturer	Lot Number	Vaccine	Pub Supp	Exp. Date	Inactive

### 2.4.1 Adding a Lot Number

Make the appropriate selections then click on the "Search" button. A screen will appear with the returned search results. From this screen, you can select one of the returned results, for edit purposes, or click on "Add A Lot Number", or return to the search screen by clicking the "Back to Search" button.

Lot Number Maintenance							
Search/Add Lot Number - Search Required Before Adding

Manufacturer:							
Lot Number:							
Facility: PEDIATRIC CLINIC						<b>Back to Search</b>	
Search Results							
Select	Facility	Manufacturer	Lot Number	Vaccine	Pub Supp	Exp. Date	Inactive
						<b>Add A Lot Number</b>	

If you click on "Add A Lot Number", the following screen will appear. From here, you can start entering information about the lot number. Required fields are labeled in red. It is recommended that you enter as much. When you are finished, click on the "Add This Lot Number" button. You will be returned to the "Lot Number Maintenance" screen.

**Note:** If a lot number has an expiration date that only includes a month and year, but no day, you should use the last day of the expiration month to complete the expiration date.

Lot Number Maintenance [Add]	
<b>Manufacturer:</b>	SKB - GLAXOSMITHKLINE
<b>Lot Number:</b>	skb112233
<b>Vaccine:</b>	IPV
Facility:	PEDIATRIC CLINIC
<b>Expiration Date:</b>	01/01/2010

<p>To add a lot number, enter your lot number information above. Complete as many of the fields as possible. Required fields are indicated by <b>red</b> text.</p> <p><b>Expiration Date Format:</b> mm/dd/yyyy</p>	

## 2.4.2 Editing a Lot Number

Make the appropriate selections then click on the "Search" button. A screen will appear with the returned search results. From this screen, select one of the returned results by clicking on the arrow button to the left of the facility name. Once you click the arrow, you will be in the "Lot Number Maintenance Detail" screen.

Lot Number Maintenance							
Search/Add Lot Number - Search Required Before Adding							
<b>Search Criteria:</b>

Doses Remaining:	0
<b>Expiration Date:</b>	01/01/2010
Publicly Supplied:	
Inactive:	

[Edit Lot Number](#)[View Lot Log](#)[View Offsite Log](#)

By clicking on the “Edit Lot Number” button, you will be able to edit the existing information in that record. Before entering edit mode, you will receive a warning message explaining that the record will be locked from other users. Once records are entered and saved, they cannot be deleted, only inactivated.

After clicking the "OK" button, you will only be able to edit the vaccine type, the facility, the expiration date, whether or not it is VFC supplied, or whether or not the lot number is inactive.

At any time, you can cancel the edit by clicking on the "Cancel" button, or you can undo the changes by clicking on the "Reset Values" button. The "Cancel" button will bring you back to the Lot Number Search screen. The "Reset Values" button will reset the current screen to its original values. If you click the "Update Now" button, the application will save your changes and bring you back to the "Lot Number Search" screen.

Add Doses(+)Subtract Doses(-)

To update a lot number, enter your lot number information above. Complete as many of the fields as possible. Required fields are indicated by **red** text.

If you are going to modify Doses Total, do that before modifying the other fields or your changes will be undone.

**Expiration Date Format:** mm/dd/yyyy

### 2.4.3 Adjusting Doses

Doses of vaccine cannot be added or subtracted until the lot number is saved in the web application. If you are going to modify Doses Total, do that before modifying the other fields or your changes will be undone. In order to see changes made for a specific vaccine, select the lot number and click on the "View Lot Log" button from the Lot Number Maintenance screen.

## 3 Settings Menu

### 3.1 About Settings

Settings allow users to select default values to be used to expedite data entry. Several key values can be entered into "Personal Settings" that will be used as the default for future record entry. Default values can be used for patient, vaccination, anatomical site, lot number, and VIS publication date information.

Default information is entered automatically when adding patient records or vaccinations. It is specifically set up for the user that is logged into the web application. It is important to set up the toolbox before personal settings because the personal settings feature relies on some of the toolbox information.

The Personal Settings feature is used in two different ways:

- When adding a new patient into the database through the web application, the patient defaults will automatically be entered into some of the fields in the patient demographic record.
- When adding new vaccinations for a patient, the Vaccination Defaults, Anatomical Injection Site Defaults, Lot Defaults, and VIS Publication Date Defaults will automatically be used to fill out some of the fields in the patient vaccination record.

**Note:** *If the user has "Client" user rights, the facility field will automatically be populated in the Personal Settings menu.*

### 3.2 Settings Menu - Personal

In the "Personal Settings" screen, click on the "click to update" or "click to add" hyperlink, next to the heading. This will put the selected box into add/edit mode. From here, you can customize any of the information in that section. Make selections using the drop down menus or type in the information.

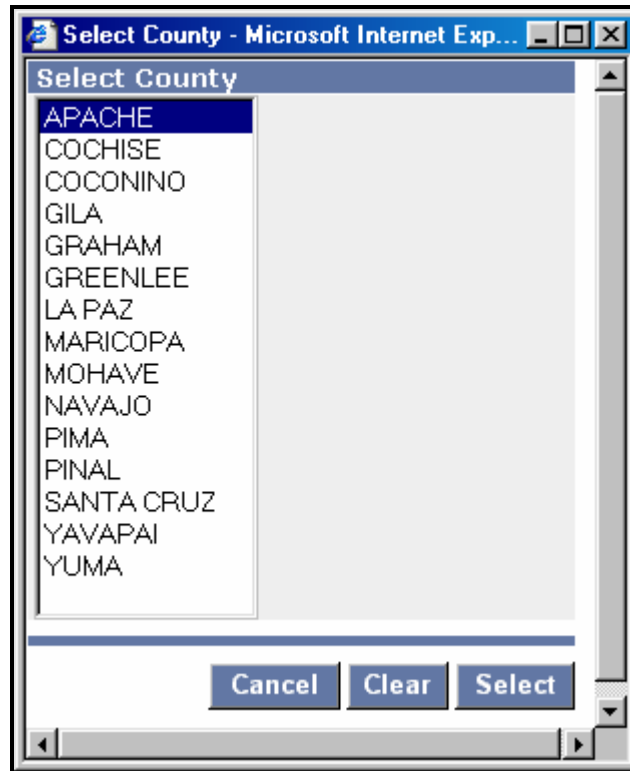

Personal Settings				
<b>Patient Defaults</b> <a href="#">click to update</a>				
Primary Care Physician: WESTMOORLAND, BRENDA MD		State: ARIZONA		
Facility: COLLEGE PARK		County/Parish: MARICOPA		
Language: ENGLISH		ZIP Code:		
Phone Area Code: 0		District/Region: 1		
City:				
<b>Vaccination Defaults</b> <a href="#">click to update</a>				
Vaccinator: WESTMOORLAND, BRENDA MD		Facility: COLLEGE PARK		
District/Region: 1				
<b>Anatomical Injection Site Defaults</b> <a href="#">click to add</a>				
Vaccine Name:		Anatomical Site:		
<b>Lot Defaults</b> <a href="#">click to add</a>				
Vaccine Name:		Manufacturer / Lot Number / Facility:		
IPV		ADAMS / AD12345 / COLLEGE PARK		<a href="#">update</a> <a href="#">delete</a>
DTaP		ABBOT / AB12345 / COLLEGE PARK		<a href="#">update</a> <a href="#">delete</a>
Hep B Ped/Adol - Preserv Free		ALPHA / ALP12345 / COLLEGE PARK		<a href="#">update</a> <a href="#">delete</a>
<b>VIS Publication Date Defaults</b> <a href="#">click to add</a>				
Vaccine Name:		Pub Date1:	Pub Date2:	Pub Date3:
Hep B Ped/Adol - Preserv Free		01/01/2002	03/01/2002	07/01/2002
		<a href="#">update</a> <a href="#">delete</a>		

When in edit mode in the "Patient Defaults" section, complete as much information as possible. A State must be selected before adding County/Parish to personal settings. The State selected will be used as a default in Birth State and Birth Country whenever adding a new patient to the IWeb2000 application.

To add the County or Parish, click the "Click to select" hyperlink located next to the County/Parish box.

Patient Defaults Update	
Primary Care Physician:	WESTMOORLAND, BRENDA MD
Facility:	COLLEGE PARK
Language:	ENGLISH
City:	
State:	AZ - ARIZONA
County/Parish:	MARICOPA <a href="#">Click to select</a>
ZIP Code:	
Phone Area Code:	( )
District/Region:	1
<a href="#">Cancel</a> <a href="#">Reset Values</a> <a href="#">Update Now</a>	

This will return a list of Counties or Parishes for the particular State you have selected. The same applies when you are in edit mode for Lot Defaults. Click on the "Click to select" hyperlink, and it will bring back a list with all the vaccine manufacturers.

If you have made an error, click on the "Reset Values" button or put the cursor in the field and click the "back" button on your keypad. If this is your first time using "Personal Settings", this button will clear the fields. If you are editing information, this will return the historical values to the boxes.

At any time, you can click on the "Cancel" button to exit out of edit mode. When you are finished adding or updating values, click on the "Update Now" button. This will return you to the "Personal Settings" main screen.

Anatomical Injection Site Defaults and Lot Defaults refer to more than one vaccine. Because of this, to add a vaccine to either list, you must click on the "click to add" hyperlink. To edit the vaccines list, you must click on the "update" hyperlink, located to the right of the vaccine you wish to edit. To remove a vaccine from either list, click the "delete" hyperlink.

### 3.3 Settings Menu - Forecast

Forecasting enables users to view the shots that will be due based on available patient information. You can view a listing of needed shots along with due dates for each patient. Before you use the Forecast feature, be sure to select the Vaccine Families you wish to forecast or unselect the Vaccine Families you do not wish to forecast. Once you are finished, click on the "Update Forecast" button.

Forecast Settings	
Vaccine Families marked as checked will be included in forecasts.	
Vaccine Family	Include
DTaP/DT/Td*	<input checked="" type="checkbox"/>
HIB	<input checked="" type="checkbox"/>
POLIO	<input checked="" type="checkbox"/>
HEP-B 3 DOSE**	<input checked="" type="checkbox"/>
MMR	<input checked="" type="checkbox"/>
VARICELLA	<input checked="" type="checkbox"/>
HEP-A	<input checked="" type="checkbox"/>
FLU	<input checked="" type="checkbox"/>
PNEUMOCOCCAL	<input checked="" type="checkbox"/>
HEP-B 2 DOSE**	<input checked="" type="checkbox"/>

Update Forecast

\* DTaP or DT should be given to patients under 7 years old. Td should be given to patients 7 years old or older.  
\*\* If an adolescent has already begun the routine 3 dose Hep-B schedule, they should not be changed to the 2 dose schedule.

### 3.4 Administrative Settings

The Administrative Settings are to be used by Administrators of the State Information Immunization System. The permission settings are in the PCI Administrator module, under Web User Maintenance. Follow the instructions below to use the Administrator Settings

Administrative Settings	
<b>Archive Age</b>	<a href="#">click to update</a>
Age: 22	
<b>Normal Login Times</b>	<a href="#">click to update</a>
Start Time: 08:05 AM	
End Time: 05:00 PM	

#### 3.4.1 Archive Age

Archive Age is a program that allows a SIIS Registry Administrator to archive patients over a certain age. For example, if your state legislation states that the only patients to be tracked within the application are children under 3 years of age, the SIIS Registry Administrator would enter the age of "4". Every thing below 4 would no longer be available to users of the SIIS web application. To use, follow these steps:

1. Enter the age of patients into the box to archive for that age and over.
2. To un-archive all records, enter "-1". This will remove all records from archive.
3. To turn off the archiving feature, enter "0". This will stop the archiving process and will leave any records previously archived alone.
4. To un-archive one record, users must open the patient record in PCI2000 and uncheck the "Archived" checkbox.
5. When finished entering the proper setting, click the "Update Now" button.
6. To cancel or reset to the previously saved settings, click the appropriate buttons.

Archive Age Update	
Age:	<input type="text" value="22"/>
<b>Possible values</b>	
<b>Any whole positive number</b> -- Any records whose age is less than the archive age are unarchived. Any records whose age is equal to or greater than the archive age are archived.	
<b>0</b> -- No records are archived. (Any previously archived records will remain archived.)	
<b>-1 (Negative 1)</b> -- Any previously archived records are unarchived.	
<input type="button" value="Cancel"/> <input type="button" value="Reset Age"/> <input type="button" value="Update Now"/>	

#### 3.4.2 Normal Login Times

Normal Login Times is a program the assists the administrators of the web application to monitor security. By setting a Start and End time, the application will track any usage outside of the time range the administrator enters.

Normal Login Times Update	
Start time:	<input type="text" value="08:05 AM"/>
End time:	<input type="text" value="05:00 PM"/>
<input type="button" value="Cancel"/> <input type="button" value="Reset Times"/> <input type="button" value="Update Now"/>	

## 4 Patient Menu

### 4.1 Patient Menu - Search/Add

In this screen, you will see patient basic information entry spaces. Some of the spaces are labeled in red, some are labeled in green, and the rest are labeled in black. The spaces labeled in red are required entries for patient search – “Edit/View Only”. This section contains first name, last name, and birth date.

The spaces labeled in green and red are required entries for patient search – “Add/Edit/View”. This section contains fields to enter the patient’s address.

**Note:** The reason more information is required for patient “Add...” is to help eliminate the duplication of patient records in the central registry.

Patient Search			
<b>Patient (basic information)</b>		<b>Patient (unique I.D.'s)</b>

<input type="radio"/> Phone Number			

#### **4.1.1 Patient (basic information)**

This area contains the fields to enter the patient's first name, last name, and date of birth. You can enter the patient's middle name here as well, but it is not a required field. Required entry fields for adding or editing information are in red.

#### **4.1.2 Patient (unique I.D.'s)**

This area contains fields to enter the patient's Social Security, Medicaid, birth file, and chart numbers. These information entries for a particular patient should never match any other patient's information. Although, sometimes the guardian's SSN is used for everyone in a household.

#### **4.1.3 Family**

This area contains fields to enter the patient's Guardian Name, Social Security Number, and Mother's Maiden Name. When adding a new patient to the database, one of these fields is required to have information in it to help protect against duplicates.

#### **4.1.4 Address**

This area contains fields to enter the patient's physical address or P.O. Box information. When adding a new patient to the database, either the physical address or P.O. Box address must be complete. The phone number is required as well. Required entry fields for adding new information are in green and red.

### 4.1.5 Searches

There are two areas to use when searching for a patient in the web application. They are Advanced Searches (add, edit, or view) and Simple Searches (edit or view only).

#### 4.1.5.1 Simple Searches - Edit or View Patient Data

Simple Searches are used to edit or view existing patient information. When conducting a simple search, the user is not required to enter information for all of the fields shown in red. Searches can be completed with limited information, including searches by:: First Initial and Birthday, Last Initial and Birthday, Social Security Number, Birth Date only, Phone Number, First Name, First and Last Name, Last Name, Medicaid Number, and Chart Number.

Existing patient information can be updated or viewed by entering the correct information in the spaces labeled in red or by performing a simple search. Once you have completed entering the required information, click on the "Edit/View Only" radio button, or make a selection from the quick searches area. Once the proper selections are made and the proper information is entered, click the "Run Search" button. A "Search Results" screen appears with all the possible matches.

If there are multiple records matching your search fields, look at the family information to find the record that most closely resembles your search. Once you have made your selection, click on the arrow button next to the name to view the record.

Patient Search Results

#### 4.1.5.2 Advanced Searches - Add, Edit, or View Patient Data

Advanced Searches are used to add, edit or view existing patient information. This search requires entry in the Patient (basic information) red fields, one entry in the Family area, one entry in the address area. A new patient record can be added by entering the correct information in the required red and green fields. Once you have completed entering the required information, click on the "Add/Edit/View" radio button and click the "Run Search" button. The following message will appear. Click "OK" to continue to add a patient.

A " Patient Search Results" screen will appear with all the possible matches. The application searches for possible matches in the database and asks you to check the possible matches to reduce duplication.

Patient Search Results							
Records Found = 0							
Select	First Name	Middle Name	Last Name	Birth Date	Grd First Name	Grd Middle Name	Grd Last Name
<p>Before adding, check to make sure the patient you want to add is not listed above.</p> <p style="text-align: right;"><a href="#">Add Patient</a></p>

<a href="#">Return To Search Page</a>							

Once you are sure the record is not a duplicate, click the "Add Patient" button. Continue to fill out the rest of the blank information fields. Remember to fill in the fields labeled with red. They are required when adding a patient.

It is important to enter as much information as possible. Click "Add Patient" when you have completed filling out the information on that page. The fields labeled in red are required fields.

When choosing "Medicaid" as the VFC status, the Medicaid # field will also turn red, meaning that an entry is required.

## 4.1.6 Searching by Bar Code

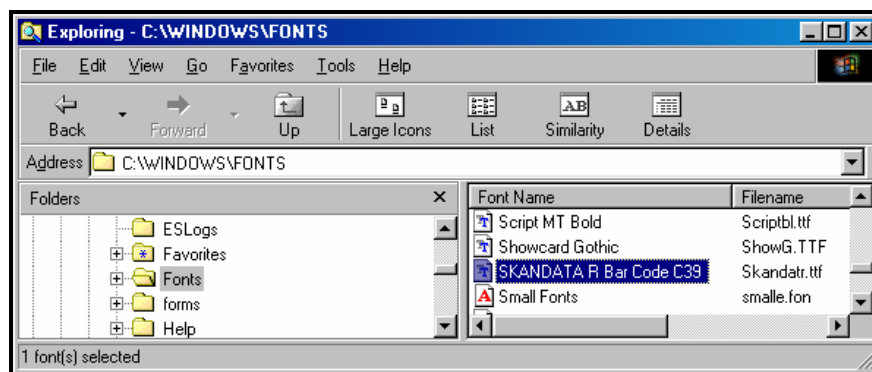

The bar code scanner is a simple solution to searching for a patient record that already exists in the central registry. All that is needed from the patient is a document of some sort with a patient ID bar code printed on it. The document can be an existing Patient Record Report, an Immunization Record Card, or even a Reminder/Recall Post Card.

### 4.1.6.1 Setting up the Scanner

The scanner is designed to work with most IBM-compatible computers with PS/2 ports, and Windows operating systems. There are a few items needed before getting started:

- Check the pc for the Bar Code font needed for scanning. If the Bar Code font is not present, check with the system administrator to obtain it.
- There should be two components of the bar code scanner:
  - The "Y" splitter cable
  - The Wedge scanner

**Step 1:** Ensure the Bar Code scanner font is installed on the computer where the scanner is to be attached. The fonts folder is usually located in the "Windows" or "WINNT" folder. For example, (C:\WINDOWS\Fonts)

**Step 2:** Turn off the computer.

**Step 3:** Attach the scanner using a "Y" splitter cable. A "Y" cable should be provided with the scanner for installation. It is called a "Y" splitter because it has three ends. One end attaches to the pc, one to the scanner and one to the keyboard. If the splitter cable does not come with the scanner, check with the system administrator to obtain it.

**Step 4:** Turn on the computer. The scanner should now be ready to use.

#### 4.1.6.2 Using the Scanner

The following steps will explain how to perform a patient search.

**Step 1:** After logging into the application, click on the Search/Add hyperlink, located in the Patient menu.

**Step 2:** Use the mouse, or the "Tab" key, to place the cursor in the data entry box labeled "SIIS Patient ID/ Bar Code". This will automatically switch the search options to "SIIS Patient ID/ Bar Code", located at the bottom of the screen.

The screenshot shows a 'Patient Search' form. It is divided into several sections: 'Patient (basic information)' with fields for First Name, Middle Name, Last Name, Birth Date, and SSN; 'Patient (unique I.D.'s)' with fields for Birth File Number, Medicaid Number, Chart Number, WIC ID, and SIIS Patient ID / Bar Code; 'Family' with fields for Guardian First Name, Guardian SSN, and Mother's Maiden Name; and 'Address' with fields for Street, City, ZIP Code, and Phone Number. Below these sections are buttons for 'Twin', 'Sibling', 'Clear All', 'Reset Values', and 'Run Search'. At the bottom, there are 'Advanced Searches' and 'Simple Searches (edit or view only)' sections. In the 'Simple Searches' section, under 'Quick Searches', the 'SIIS Patient ID / Bar Code' option is selected and circled in blue. In the 'Other Searches' section, the 'WIC ID' option is also circled in blue. The 'First Name / Last Name' section shows radio buttons for 'First Name', 'FN & LN', and 'Last Name', and a 'Select search type for First and Last Name' section with radio buttons for 'Exact', 'Like', and 'Phonetic'.

**Step 3:** While pressing the button on the bottom of the scanner, scan the patient's bar code. To scan the bar code, follow the these instructions:

- Approach, point, or touch the bar code label with the window of the scanner.
- Center the scanner on the bar code for a faster read.
- Scan with a distance of 0" to 1".
- The scanner will "beep" or display a green LED with a good scan.

After the bar code is scanned, the application will automatically perform z search for the patient record and will return with that patient's record in a patient demographic page, not the patient search result page. If there is no patient match, the search result page will be displayed with "No Match" message.

**Step 4:** Select the patient from the results screen.

#### 4.1.7 Programs

A screen will appear that shows all the demographic information for that patient. At the bottom of this screen are two buttons, "Update Programs" and "Edit Record". The "Update Programs" button is used to add special programs to the patient's record. An example of a special program is WIC. The "Edit Record" button will put the record in edit mode. From edit mode, you may change or add any information.

Patient Demographics			
<b>Patient</b>

<b>Record Info</b>			
SIIS Patient ID:	5526		
		<b>Update Programs</b>	<b>Edit Record</b>

When you click on the "Update Programs" button, you will be taken to a " Patient Programs Add/Remove" screen as shown below. This screen allows you to select programs that are available in your state. Click on the drop down menu and choose from the list. Next, enter in the member ID for that particular program. You also have the option of editing program and ID information or deleting the program from the patient information. When you are finished, click the "Save Changes" button, or click "Cancel" to return to the "Patient Demographics" screen.

Patient	
Name:	HANK AARON III
Date Of Birth:	01/01/1995
Guardian:	RUTH
Patient Programs Add/Remove	
Add Program: (select a program to ADD and enter Member ID, if known)	
<input type="text" value="-select-"/>	Member ID: <input type="text"/>
Update Current Program: (select a program to UPDATE and enter new Member ID)	
<input type="text" value="-select-"/>	Member ID: <input type="text"/>
Remove Current Programs/Member IDs: (check programs to REMOVE)	
(none)	
<input type="button" value="Cancel"/> <input type="button" value="Save Changes"/>	

**Note:** If you update a member ID and remove the program at the same time, the program will be removed.

#### 4.1.8 Other Buttons

The "Twin" and "Sibling" buttons are used to simplify data entry when adding or editing patient records from the same family or address. When the "Twin" button is clicked, it automatically enters the same last name, date of birth, family information, and address information. When the sibling button is clicked, it does the same as the "Twin" button, except it does not enter a date of birth.

The "Cancel" button is used to cancel the entire entry of information for the particular patient. When you click the button, it will take you back to the search results screen. The "Reset Values" button is used for starting over on that same page. When you click on the "Reset Values" button, it clears all the information in the fields that were recently entered.

#### 4.2 Patient Menu – Search Results

Once you have done a search for a patient's record, click on the "Search Results" hyperlink to return to the "Search Results" screen. This is useful when you were looking at one patient's record and you want to look at the next one rather than clicking the "Back" button in the web browser.

#### 4.3 Patient Menu – Demographics

The "Demographics" menu item is useful for going back to the most recent patient record you were looking at or working in.

## 5 Vaccination Menu

### 5.1 Vaccinations Menu - History

This section describes the procedures for entering patient immunization information. The vaccination history screen shows a complete list of vaccinations recorded for a particular patient. You can view the type of vaccination and the date given, determine if it was historical, if the patient had an adverse reaction to the vaccine, and conduct a forecast for needed vaccinations.

Once a patient's record has been retrieved as described in Section 4, click on the history link on the left side of the screen to bring up the patient's immunization record.

Patient									
Name:	HANK AARON III								
Date Of Birth:	01/01/1995								
Guardian:	RUTH								
Age:	392 weeks, 90 months, 7 yrs								
Vaccination History									
(historicals marked by *, adverse reaction marked by #)									
Vaccine	1	2	3	4	5	6	7	8	
<input type="checkbox"/> DTaP									
<input type="checkbox"/> Td (Adult)									
<input type="checkbox"/> IPV									
<input type="checkbox"/> MMR									
<input type="checkbox"/> Hib									
<input type="checkbox"/> Hep B Ped/Adol - Preserv Free									
<input type="checkbox"/> Varicella									
<input type="checkbox"/> Pneumococcal									
<input type="checkbox"/> Hep B/Hib									
Vaccinations outside the ACIP schedule are marked with an <span style="color: red;">X</span> .									
Add Vaccinations			Add Historicals (Grid)			Contraindications			
Allergies/Comments									

**Note:** *It is important to know that only the users at the facility where the shot was administered can edit an "Administered" shot. If you need to see the detail of one vaccine, you can click on the date. The date of the vaccination is hyperlinked and will take you to the record.*

### **5.1.1 Administered Shot Date**

In the Vaccinations Record, if a shot is administered, it is shown with the date minus an asterisk.

### **5.1.2 Historical (Non-Administered) Shot Date**

A date followed by an asterisk indicates a non-administered or historical shot.

### **5.1.3 Adverse Reaction**

If a patient has an adverse reaction to an administered shot, there will be a number symbol next to the date.

### **5.1.4 Invalid Vaccination**

A date preceded by a red "X" indicates that the vaccination in a particular series was not administered according to recommendations by the ACIP.

### 5.1.5 Adding Common Vaccinations

You have the capability to add additional vaccines in a series, which are listed. Click in the check box located next to the vaccine name. Next, click on the “Add Vaccinations” button to enter administered doses and the web application will bring up the information entry screen.

Patient									
Name:	HANK AARON III								
Date Of Birth:	01/01/1995								
Guardian:	RUTH								
Age:	392 weeks, 90 months, 7 yrs								
Vaccination History									
(historicals marked by *, adverse reaction marked by #)									
Vaccine	1	2	3	4	5	6	7	8	
<input checked="" type="checkbox"/> DTaP	03/01/1995 *								
<input checked="" type="checkbox"/> IPV	03/01/1995 *								
<input checked="" type="checkbox"/> Hep B Ped/Adol - Preserv Free	01/01/1995 *								
<input type="checkbox"/> MMR	01/01/1996 *								
<input type="checkbox"/> Varicella	01/01/1996 *								
<input type="checkbox"/> Td (Adult)									
<input type="checkbox"/> Hib									
<input type="checkbox"/> Pneumococcal									
<input type="checkbox"/> Hep B/Hib									
Vaccinations outside the ACIP schedule are marked with an 'X'.									
Add Vaccinations			Add Historicals (Grid)			Contraindications			
Allergies/Comments									

From here, check all the information and make any changes, if necessary. The system will automatically enter today's date as the date of administration. If you need to enter a historical date, simply type the date into the box provided. This date will remain in effect until the user changes it, or the session has ended. Additionally, it will change the dates in the rest of the date fields.

After you complete entering that information, click on "Add Records Now" to proceed forward, or "Cancel" to return to the vaccination history screen.

<b>Vaccine 2:</b>	IPV

	1. <input type="text" value="01/01/2002"/>	2. <input type="text" value="03/01/2002"/>	3. <input type="text" value="07/01/2002"/>	4. <input type="text"/>
<b>Date VIS Form Given:</b>	<input type="text" value="02/01/1995"/>			

### 5.1.6 Adding Other Vaccinations

Up to six vaccines can be entered at one time by clicking on the "Add Vaccinations" button. The web application will bring up the information entry screen. From there, you can choose the type of vaccination and the date it was administered, and indicate whether or not the shot was historical or administered at the user's facility.

The system will automatically enter today's date. If you need to enter a historical date, simply type the date into the box provided. This date will remain in effect until the user changes it, or the session has ended. Additionally, it will change the dates in the rest of the date fields.

After you complete entering that information, click on "Continue" to proceed forward or click on the "Cancel" button to return to the vaccination history screen.

Patient	
Name:	HANK AARON III
Date Of Birth:	01/01/1995
Guardian:	RUTH
Vaccination Detail Add (Step 1 of 2)	
Vaccine 1:	<input type="text"/>
Date Administered:	02/01/1995
Historical:	<input type="radio"/> YES <input checked="" type="radio"/> NO
Vaccine 2:	<input type="text"/>
Date Administered:	02/01/1995
Historical:	<input type="radio"/> YES <input checked="" type="radio"/> NO
Vaccine 3:	<input type="text"/>
Date Administered:	02/01/1995
Historical:	<input type="radio"/> YES <input checked="" type="radio"/> NO
Vaccine 4:	<input type="text"/>
Date Administered:	02/01/1995
Historical:	<input type="radio"/> YES <input checked="" type="radio"/> NO
Vaccine 5:	<input type="text"/>
Date Administered:	02/01/1995
Historical:	<input type="radio"/> YES <input checked="" type="radio"/> NO
Vaccine 6:	<input type="text"/>
Date Administered:	02/01/1995
Historical:	<input type="radio"/> YES <input checked="" type="radio"/> NO
<input type="button" value="Cancel"/> <input type="button" value="Continue"/>	

From here, the type of vaccination and the date administered will automatically be filled in. If you need to enter a historical date, simply type the date into the box provided. Additionally, you can enter information regarding the Manufacturer, Lot Number, Vaccinator, Facility, Anatomical Site, VFC Status, Adverse Reaction, and VIS Publication Dates. After you enter in all the pertinent information, you can either "Cancel" and return to the vaccine history screen, or "Reset Values" and start the page over, or "Add Records Now" to add the vaccinations to the central registry.

Patient	
Name:	HANK AARON III
Date Of Birth:	01/01/1995
Guardian:	RUTH
Vaccination Detail Add (Step 2 of 2)	
<b>Vaccine 1:</b>	DTaP
<b>Date Administered:</b>	01/01/1996
<b>Historical:</b>	No
<b>Manufacturer:</b>	ABBOT <a href="#">Click to select</a>
<b>Lot Number:</b>	AB12345
<b>Lot Facility:</b>	COLLEGE PARK
<b>Vaccinator:</b>	WESTMOORLAND, BRENDA MD
<b>Facility:</b>	COLLEGE PARK
<b>Anatomical Site:</b>	-unknown-
<b>VFC Status:</b>	Patient is not VFC Eligible.
<b>District/Region:</b>	1
<b>VIS Publications Dates:</b>	Enter below:
	1. <input type="text"/> 2. <input type="text"/> 3. <input type="text"/> 4. <input type="text"/>
<b>Date VIS Form Given:</b>	01/01/1996
<b>Vaccine 2:</b>	IPV
<b>Date Administered:</b>	01/01/1999
<b>Historical:</b>	No
<b>Manufacturer:</b>	ADAMS <a href="#">Click to select</a>
<b>Lot Number:</b>	AD12345
<b>Lot Facility:</b>	COLLEGE PARK
<b>Vaccinator:</b>	WESTMOORLAND, BRENDA MD
<b>Facility:</b>	COLLEGE PARK
<b>Anatomical Site:</b>	-unknown-
<b>VFC Status:</b>	Patient is not VFC Eligible.
<b>District/Region:</b>	1
<b>VIS Publications Dates:</b>	Enter below:
	1. <input type="text"/> 2. <input type="text"/> 3. <input type="text"/> 4. <input type="text"/>
<b>Date VIS Form Given:</b>	01/01/1999
<input type="button" value="Cancel"/> <input type="button" value="Reset Values"/> <input type="button" value="Add Records Now"/>	

Enter the information as indicated below. Once all information is entered, click on the "Add This Record" button to enter the new information into the patient's vaccination record. If other immunizations need to be entered, you can continue to do so by repeating the steps above.

Below are the values that need to be entered for an administered vaccination:

<b>Manufacturer/ Lot Number</b>	Select the Manufacturer/ Lot Number from the pull-down menu located to the right of the field.
<b>Vaccinator</b>	Select the Vaccinator who administered the vaccination from the pull-down menu located to the right of the field.
<b>Facility</b>	Select the Facility where the vaccination was administered from the pull-down menu located to the right of the field.
<b>Anatomical Site</b>	Select the Anatomical Site where the vaccination was administered from the pull-down menu located to the right of the field.
<b>VFC Status</b>	Select the current VFC Status for the patient from the pull-down menu located to the right of the field.
<b>Adverse Reaction</b>	If the patient has had an adverse reaction to the vaccination, select the appropriate reaction from the pull-down menu located to the right of the field.
<b>VIS Publications Dates</b>	Enter the publication dates of the VIS (Vaccine Information Statement) forms.
<b>Date VIS Form Given</b>	Enter the date the VIS form was provided to the patient.

Many of the above values can be set as default values in the user's "Personal Settings" as described in Section 3.

### 5.1.8 Adding Contraindications

If a patient has contraindications, the "Contraindications" button will be **RED**. It is important to make sure you select the proper vaccine that the child is contraindicated for. If the medical or nursing staff notes a Contraindication or Refusal, mark the appropriate reason. When you click on a reason, only the *valid* reasons for that vaccine appear. Enter the contraindications, along with Valid ACIP reasons in the Contraindications window. If you have been given a reason that is not on this list, it is not a valid reason. *Ask the appropriate staff if you have any questions.* It is best to ascertain any problems a patient may have with certain vaccines before administering immunizations.

**Note:** *CASA assesses coverage levels only; contraindications and refusals will be assessed as incomplete coverage for that antigen.*

Vaccine Contraindications		
Vaccine	Contraindication	Permanent
<b>Add Contraindication</b>		
Vaccine	--select--	<input type="checkbox"/>
Contraindication	<input type="text"/>	<a href="#">Click to select</a>
Permanent	<input type="checkbox"/>	
<b>Add This Contraindication</b>		<b>Cancel</b>

## 5.2 Vaccinations Menu - Forecast

Vaccination Forecasting enables you to view the shots that will be due based on the patient information that has been entered into the database using PCI-Client or the PCI Web Application. You can view a listing of shots that are due, along with their dates, for each patient. The forecast automatically switches to the accelerated schedule when a patient is behind schedule.

Patient			
Name:	HANK AARON III		
Date Of Birth:	01/01/1995		
Guardian:	RUTH		
Vaccination Forecast			
The forecast automatically switches to the accelerated schedule when a patient is behind schedule.			
Vaccine Family	Dose	Recommended Date	Minimum Valid Date
DTaP/DT/Td*	5	01/01/1999	01/01/1999
* DTaP or DT should be given to patients under 7 years old. Td should be given to patients 7 years old or older.			
** If an adolescent has already begun the routine 3 dose Hep-B schedule, they should not be changed to the 2 dose schedule.			

## 5.3 Vaccinations Menu – Summary

The Vaccinations Summary Menu is used to look at certain vaccine families without having to look at the complete vaccine history. It can be used as a printable report of the patient's vaccinations.

Patient								
Name:	HANK AARON III							
Date Of Birth:	01/01/1995							
Guardian:	RUTH							
Vaccination Summary								
Does not include all vaccination types.								
Vaccine	1	2	3	4	5	6	7	8
DTaP/DTP/DT/Td	03/01/1995	05/01/1995	07/01/1995	01/01/1996				
OPV/IPV	03/01/1995	05/01/1995	07/01/1995	01/01/1999				
MMR	01/01/1996	01/01/1999						
Hep B - 3 Dose	01/01/1995	02/01/1995	07/01/1995					
Varicella	01/01/1996							
Vaccinations outside the ACIP schedule are marked with an X.								

## 6 Reports Menu

In the Reports menu, you can select the various types of reports you may need. There is no set sequence to follow in generating the various reports available in the Web Application. It is your option, which reports you may want to view and print. It is suggested that if you are in a specific patient's record, you may wish to view and print his/her shot record. This is explained below.

There is a variety of reports that you can generate, based upon the patient information that has been entered into the web application. You can view and print a patient's immunization record and prepare immunization summary reports, patient summary and detail reports, and special reports. Clicking on "Reports Module" opens the Reports menu where you can select the various types of reports you may need.

### 6.1 Reports Menu - Patient Record

When you have searched for a patient and found him/her, click on the menu "Patient Record". A patient report option screen will appear. In the first option, you can choose to include or not include confidential information. In the second option, there are three report choices, all recorded vaccinations, immunization record (summary), or forecast. Once you have chosen an option, click the "Print" button. A report will appear in a new window, for the patient whose demographic information you last viewed. You have the option of printing the report or just viewing it.

**Print Patient Record**

**Patient Information To Include**

☒ Do Not Include Confidential Information  
☐ Include Confidential Information

---

**Vaccination Record Choices**

☒ All Recorded Vaccinations  
☐ Immunization Record (summary)  
☐ Forecast

**Create Report**

## 6.2 Reports Menu - Report Module

The Reports Module allows you to generate a variety of reports. Select "Reports Module" from the Reports menu.

Reports	
Vaccinations	Patients
Vaccination Totals	Daily Patient Immunization List
Lot Number Summary	Patient Detail
Manufacturers	Patient Totals
Vaccinations Breakdown	Patient Breakdown
	Reminder Recall for Inactivation
Vaccines for Children	Site Information
VFC Vaccinations Breakdown	Programs
Vaccine Administered	Health Plans
VFC Accountability Log	Facilities Detail
	Physician/Vaccinator Detail
Administrative	
Patient Queries	
Patient Changes	

**NOTE:** In many of the following reports, you have the option of including all the items or you can limit the report by selecting specific items. If you want to include all items, simply click the "Print" button without using the "Limit Report By" selections.

## 6.2.1 Vaccinations

There are a number of reports for vaccinations as described below.

Vaccinations
<a href="#">Vaccination Totals</a>
<a href="#">Lot Number Summary</a>
<a href="#">Manufacturers</a>
<a href="#">Vaccinations Breakdown</a>

### 6.2.1.1 Vaccine Totals

This report summarizes the total number of vaccinations by Facility, Physician/Vaccinator, Program, Health Plan or Zip Code. You can include Historical Vaccinations by clicking in the checkbox to the left. You can limit the report by Vaccination Dates by clicking in the checkbox and entering "From" and "To" dates. If these dates are entered incorrectly, a message box will open informing you of the error. Click "OK" and enter the date with the proper MM/DD/YYYY format. You can also select the VFC status Eligible, Ineligible, or All. To specify the Report Type, click in the appropriate circle to make your selection.

Vaccination Totals		
Report Criteria		Report Date: May 9, 2002
IRMS:	1001 - GENERAL HOSPITAL (TEST)	
Report Type:	By Vaccinator	
VFC Status:	All	
Include Historical Vaccinations:	Yes	
Vaccination Date Range:	All	
Total Vaccinations Selected: 517		
Vaccinator	Number of Vaccinations	Percent of Total Selected
NO VACCINATOR SPECIFIED	257	49.71
ANDERSON, JAMES	14	2.71
ANDERSON, JOHN	3	0.58
ARCHIE, INI	6	1.16
ATOB, PAUL	1	0.19
BREWER, JAMES	1	0.19
CANTZ, CARLA	1	0.19
DANIEL, EMMETT	1	0.19
DOE, JOHN	4	0.77
FOSTER, HUBERT	2	0.39
GUTIERREZ, ANTONIO	22	4.26
JOHNSON, ELIAS	4	0.77
MARTIN, EDWARD	101	19.54
MATTHEWS, ANDREA	23	4.45
MCCLOURE, HENRY	4	0.77
STEPHENSON, BRAD	9	1.74
TESTER, TERRY	2	0.39
THORNTON, DEAN	1	0.19
VANHUSEN, MARK	13	2.51
WESTMOORLAND, JOHNNY	45	8.7
WILLIAMS, JENNA	1	0.19
ZORRO, JOE	2	0.39

### 6.2.1.2 Lot Number Summary

Lot Number Summary produces a report that shows a summary of the lot numbers corresponding to the vaccinations in the application. Click in the checkbox to include "inactive lot numbers" and "expired lots." Specify the Expiration Date range, by entering "From" and "To" dates. If these dates are entered incorrectly, a message box will open informing you of the error. Click "OK" and enter the date with the proper MM/DD/YYYY format. Use the pull-down menus to select Facility Name, Manufacturer, and Vaccine Name. Further, you can specify if the vaccines were VFC supplied only. Use the radio buttons (click in a circle) to specify whether you want the report ordered by Vaccine Name, Manufacturer, Expiration Date, or Lot Number.

Lot Number Summary								
Report Criteria:					Report Date: May 9, 2002			
IRMS:	1001 - GENERAL HOSPITAL (TEST)				Include Expired Lots:	No		
Inactive Lot Numbers:	No				Facility:	All		
Vaccine Name:	All				Expiration Date Range:	All		
Publicly Supplied Only:	No				Sort Order:	Vaccine Name		
Manufacturer:	All							
Lot Number	Vaccine Name	Manufacturer	Expires	VFC Eligible	Doses Used	Doses Total	Doses Remaining	Inactive
666	Anthrax	U.S. ARMY MEDICAL RESEARCH	01/01/2020	Y	0	100	100

### 6.2.1.3 Manufacturers

This report provides a list of the manufacturers by Code and Name.

Vaccine Manufacturers			Report Date: May 9, 2002
Manufacturer Code	Manufacturer		
AB	ABBOT		
AD	ADAMS		
ALP	ALPHA		
AR	ARMOUR		
AVB	AVENTIS BEHRING L.L.C.		
PMC	AVENTIS PASTEUR INC.		
AVI	AVIRON		
BA	BAXTER		
BAH	BAXTER HEALTHCARE CORPORATION		
BAY	BAYER CORPORATION		
BP	BERNA		
BPC	BERNA PRODUCTS CORPORATION		
CMP	CELLTECH MEDEVA PHARMACEUTICAL		
CEN	CENTEON L.L.C.		
CHI	CHIRON CORPORATION		
CON	CONNAUGHT		
EVN	EVANS		
SKB	GLAXOSMITHKLINE		

### 6.2.1.4 Vaccinations Breakdown

Vaccinations Breakdown produces a report that shows a summary of the number of vaccinations given. Vaccination Date Range, Birth Date Range, Facility, Physician/Vaccinator, VFC code, health plan, program, ethnic origin, and zip code can sort the report.

Vaccinations Breakdown		
Report Criteria		Report Date: May 9, 2002
Include Inactive Patients?: No		
Facility: All	Birth Date Range: All	
Vaccinator: All	VFC Code: All	
Health Plan: All	Program: All	
Race: All	Zip Code: All	
Include Historical Vaccinations?: No	State: All	
Vaccination Date Range: All	County: All	
	District/Region: All	
Selected Total: 289		
Vaccine Name	Number of Vaccinations	Percent of Total Selected
Anthrax	2	0.69
CMVIG	1	0.35
DT (Pediatric)	2	0.69
DTP	9	2.77
DTP - unspecified	1	0.35
DTP/Hib	4	1.38
DTaP	53	18.34
DTaP/Hep B/IPV	1	0.35
DTaP/Hib	2	0.69
Diphtheria Toxoid	1	0.35
Hep A 2 dose - Ped/Adol	2	0.69
Hep B - unspecified	2	0.69
Hep B 2 dose - Adult/Adol	1	0.35
Hep B Ped/Adol - Preserv Free	9	2.77
Hep B Ped/Adol - w/Thimerosal	1	0.35

### 6.2.2 Patients

There are several patient reports available as described below.

Patients
<a href="#">Daily Patient Immunization List</a>
<a href="#">Patient Detail</a>
<a href="#">Patient Totals</a>
<a href="#">Patient Breakdown</a>
<a href="#">Reminder Recall for Inactivation</a>

#### 6.2.2.1 Daily Patient Immunization List

This report gives a list of patients who received vaccinations for a particular date.

Daily Patient Immunization List					
Report Criteria					Report Date: May 9, 2002
Begin Date (Shots Given on this Date): 02/02/2002					
Facility: All					
Vaccinator: All					
Total Number of Vaccines: 9					
Total Number of Patients: 5					
Patient Name	Birth Date	Vaccine	Dose	Facility	Vaccinator
CLARK, KENYATTA ANTONIO	06/23/1975	DTP - unspecified	2	TEST	MARTIN, EDWARD
JONES, BOBBY MICHAEL	01/01/2001	Hep B Ped/Adol - Preserv Free	2	COWABUNGA CLINIC	WESTMOORLAND, JOHNNY
JONES, TOMMY	01/01/1999	DTP	1	TEST	MARTIN, EDWARD
JONES, TOMMY	01/01/1999	IPV	1	TEST	MARTIN, EDWARD
JONES, TOMMY	01/01/1999	Rotavirus	2	TEST	MARTIN, EDWARD
JONES, TOMMY	01/01/1999	Yellow Fever	1	TEST	MARTIN, EDWARD
TESTMORE, TOMMY	12/25/2001	DTP	1	TEST	MARTIN, EDWARD
TESTMORE, TOMMY	12/25/2001	Hep B/Hib	1	TEST	MARTIN, EDWARD
TOOMEY, TOMMY	01/01/2002	DTaP	1	TEST	MARTIN, EDWARD

### 6.2.2.2 Patient Detail

This report provides detailed patient information. Vaccination Date Range, Birth Date Range, Facility, Physician/Vaccinator, Program, Health Plan, Ethnic Origin, VFC Code, Lot Number and Zip Code can sort the report. You can include "Inactive Patients" by clicking in the checkbox to the left. You can limit the report by clicking one or more of the checkboxes. For Vaccination and Birth Date ranges enter the appropriate "From" and "To" dates.

Patient Detail Report					
Report Criteria			Report Date: May 9, 2002		
Include Inactive Patients: No		Vaccination Date Range: All			
Facility: All		VFC Code: All			
Physician: All		Program: All			
Health Plan: All		Zip Code: All			
Race: All		State: All			
Lot Number: All		County/Parish: All			
Birth Date Range: All		District/Region: All			
Total Patients Selected: 179 Deleted vaccinations are shown with a line through them.					
First Name	Middle Name	Last Name	Birthday	Guardian F.N.	Phone Number
JAMES		ANDERSON	01/01/1999		(504)382-3289
Vaccine Name	Vaccination Date	Manufacturer Code	Lot Number	Historical

KINGSLEY		ARCHI	06/21/1996		(770)323-8856
Vaccine Name	Vaccination Date	Manufacturer Code	Lot Number	Historical	
DTP	06/30/1997			Y	

### 6.2.2.3 Patient Totals

This report provides the total number of patients. Total Patients per Facility, Total Patients per Physician, Total Patients per Program, Total Patients per Health Plan or Total Patients per Zip Code can sort the report. You can limit the report by Visit date range. Click in the checkbox and enter the "From" and "To" dates. Select how you would like the report sorted by clicking in the appropriate circle.

Patient Totals		
Report Criteria		Report Date: May 9, 2002
IRMS: 1001 - GENERAL HOSPITAL (TEST)		
Report Type: By Facility		
Visit Date Range: All		
Total Patients Selected: 188		
Facility	Total Patients	Percent of Total Selected
ACT1	2	1.06
AMERICAN COMPUTER	1	0.53
ARIZONA MEDICAL CENTER	1	0.53
CHANDLER WOMEN'S CLINIC	1	0.53
CHILDRENS HOSPITAL	1	0.53
COUNTY HEALTH	11	5.85
COWBUNGA CLINIC	7	3.72
DANIEL'S COUNTY CLINIC	1	0.53
DECATUR CLINIC	1	0.53
EAST VALLEY PEDIATRICS	3	1.6
GENERAL HOSPITAL	10	5.32
GENERAL MEDICAL CENTER	1	0.53
MACKENTIRE	1	0.53
MY FAKE FACILITY	2	1.06
PEDIATRIC CLINIC	1	0.53
RIVERTON	1	0.53

45 - 64	1	0.56
65+	0	0.0

#### 6.2.2.5 Reminder Recall for Inactivation

This report provides information regarding the patients that have exceeded the number of recall tries defined by the user. This information is useful for deactivating patients that do not respond to the recall.

Patient Reminder Recall for Inactivation Report					
Report Criteria					Report Date: March 20, 2002
<div>Number of Recall Tries Greater than or Equal To: 3</div> <div>Birth Date Range: 01/01/1990 to 01/01/2002</div> <div>Facility: COWABUNGA CLINIC</div>					
Total Patients Selected: 2					
Patient ID	First Name	Middle Name	Last Name	Birthday	# of Recall Tries
1022	RANDY		JOHNSON	01/02/1997	7
1010	TIMMY		TEST	01/01/1999	7

### 6.2.3 Vaccines for Children

The Vaccines for Children reports are described below.

Vaccines for Children
<a href="#">VFC Vaccinations Breakdown</a>
<a href="#">Vaccine Administered</a>
<a href="#">VFC Accountability Log</a>

#### 6.2.3.1 VFC Vaccinations Breakdown

VFC Breakdown generates a report that breaks down the VFC vaccinations by Vaccination Date Range, Patient Birth Date Range, and Ethnic Code. Click in the checkbox for Vaccination Date Range and/or Patient Birth Date Range and enter the appropriate "From" and "To" dates. To include an Ethnic Code, click in the checkbox and select an ethnic code from the pull-down menu.

VFC Vaccination Breakdown		
Report Criteria		Report Date: May 9, 2002
IRMS: 1001 - GENERAL HOSPITAL (TEST)		
Vaccination Date Range: All		Physician/Vaccinator: All
Birth Date Range: All		State: All
Race: All		County/Parish: All
Facility: All		District/Region: All
Health Plan: All		
Selected Total: 22		
VFC	Total Vaccinations	Percent of Total Selected
Hoosier H/Wise Pkg C	1	4.55
KidsCare	4	18.18
Medicaid	10	45.45
Nat. Amer.or Alaskan	1	4.55
Underinsured	2	9.09
Uninsured	4	18.18

### 6.2.3.2 Vaccine Administered

Generates a report of the vaccines administered. Enter the name of the person completing the report, along with a phone number. You have two print options: By Vaccine or By Lot. (Click the appropriate button.) You can limit the report by Vaccination Date Range and Facility by clicking in the appropriate checkboxes. Enter the "From" and "To" dates for the Vaccination Date Range. Select the Facility from the pull-down menu. Click in the appropriate circle to select VFC Eligibility (VFC Eligible Vaccinations Only or All Vaccinations).

Vaccine Administered Report																
Includes ALL Vaccination Date																
Facility:																
Provider Number:																
Date Submitted:		May 9, 2002														
Person completing report:		tester														
Phone number:		(888)555-6857														

### 6.2.3.3 VFC Accountability Log

This generates a report from the VFC Accountability Log. Click in the checkbox to the left, if you want to "Include Ineligible Patients". You can limit the report by "Vaccination Date Range" and "Facility" by clicking in the appropriate checkboxes. Enter the "From" and "To" dates for the Vaccination Date Range and select the Facility from the pull-down menu.

Vaccines For Children (VFC) Program Vaccine Accountability Log for Public Provider/Hospital(Private and Public) Use																					
Includes both VFC Eligibles(0 - 18 years) and VFC Ineligibles																					
Patient Date of Birth	Patient Vacc Date	Medi- caid	Un- insured	Amer Indian or Alaskan	Under- insured	Not Elig	DTaP	DT Peds	TD (>= 7yroltd)	DTP/ Hib	Hib	HR	Hep B /Hib	OPV	IPV	MMR	Hep B Peds	Hep B HR- Infants	Hep B Adol	Vari- cella	Hep A

## 6.2.4 Site Information

The available Site-related reports are described below.

Site Information
<a href="#">Programs</a>
<a href="#">Health Plans</a>
<a href="#">Facilities Detail</a>
<a href="#">Physician/Vaccinator Detail</a>

### 6.2.4.1 Programs

A report that shows the names of the programs available, and whether they are active or not.

Programs		
Name	Inactive	Report Date: May 9, 2002
KIDSHOTS		
KIDVACCS		
PASPORT		
WIC		

### 6.2.4.2 Health Plans

A report that summarizes the health plans available, along with their status (i.e. inactive, active, or Medicaid).

Health Plans		
Name	Medicaid	Inactive
AETNA		
CIGNA		
INTERGROUP		
RED CROSS		

### 6.2.4.3 Facilities Detail

This report summarizes the facilities detail available. You can limit the report to a specific Facility by selecting one from the pull-down menu, or click the Print button to include all facilities.

Facilities Detail						
Report Criteria:				Report Date: May 9, 2002		
Facility:	All

### 6.2.5 Administrative

The Administrative Reports are used in conjunction with the Security Module. The Security Module is used to track who is searching for a patient's record, or who is making changes to the patient's record. The reports will display the information from the Security Module.

<b>Administrative</b>
<a href="#">Patient Queries</a>
<a href="#">Patient Changes</a>

#### 6.2.5.1 Patient Queries

This report tracks who has queried for a specific patients record. To run the report, fill in the patient information and click the "Create Report" button. Click the back button on the browser to return to the previous screen.

Patient Queries Report			
			<b>Report Date:</b> July 12, 2002
<b>Patient Data</b>			
First Name: Tommy			
Last Name: Test			
Birth Date: 01/01/2001			
<b>Total Queries:</b> 0			
Date	Time	User	Facility

#### 6.2.5.2 Patient Changes

This report tracks who has made changes to a specific patients record. To run the report, fill in the patient information and click the "Create Report" button. Click the back

button on the browser to return to the previous screen.

Patient Changes Report			
			Report Date: July 12, 2002
<b>Patient Data</b>			
First Name: Tommy			
Last Name: Test			
Birth Date: 01/01/2001			
<b>Total Changes: 1</b>			
User	Date	Time	Change Type
	07/12/2002	02:03:27 PM	Demographic

### 6.3 Reports Menu - State Reports

The state reports are a set of customizable reports that apply only to the specific needs of a particular state. For more information, refer to **Appendix B**.

**Note:** For more information on this feature, contact your State Immunization Consultant/Coordinator.

### 6.4 Reports Menu - Management Reports

The Management Report Module is also a customizable reporting tool for upper level managers to reflect immunization rates, to make assessments on information, or to recall patients throughout an IRMS, county, region, state, etc. For more information, refer to **Appendix C**.

**Note:** For more information on this feature, contact your State Immunization Consultant/Coordinator.

## 7 CASA Export

### 7.1 About WinCASA

To conduct immunization assessments, the Web Application exports a file for use by **WinCASA (Windows version of the Clinic Assessment Software Application)**. WinCASA is a separate software package that has been developed by the Centers for Disease Control and Prevention to assess immunization coverage rates in a standard manner.

The **Standards for Pediatric Immunization Practices** state that providers conduct semi-annual audits to assess immunization coverage levels and to review immunization records in the patient populations they serve. In both, the public and private sector, the assessment of immunization services for pre-school-aged patients should include audits of immunization records or inspection of a random sample of records to determine the immunization coverage level. Additionally, identify how frequently opportunities for simultaneous immunization are missed, and to assess the quality of documentation. The results of assessments should be discussed by providers as part of their ongoing quality assurance reviews and used to develop solutions to the problems identified.

The primary purpose of the WinCASA is to help providers implement this recommended practice. WinCASA can also be used to collect information on all clinical encounters in order to assess if providers utilize all clinical encounters to screen for needed vaccines and, when indicated, immunize children.

### 7.2 Using CASA Export

From the Main Menu select CASA Export. This will bring up the CASA Export screen as shown below.

**Export to CASA**

**Patient Status** ☒ Active Only ☐ Inactive Only ☐ All

**Patient Birthday Range** **From:**  **To:**

**Limit Export by:**

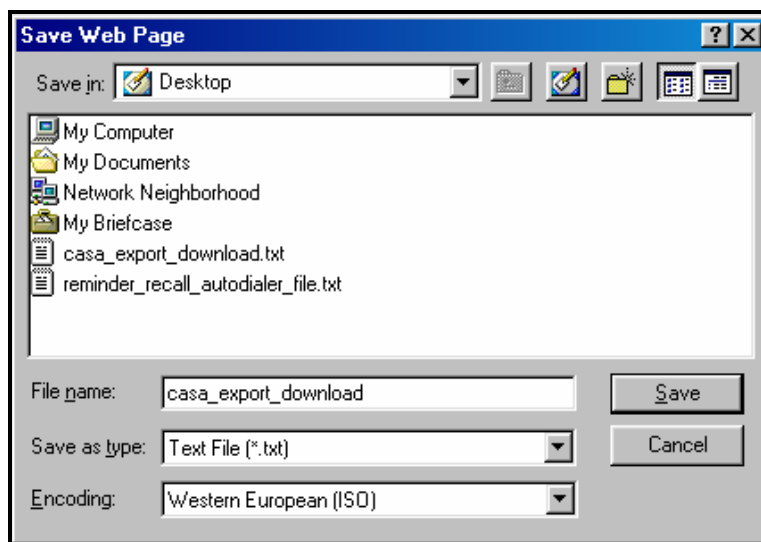

<input type="checkbox"/> Facility	<input type="text" value="-select-"/>
<input type="checkbox"/> Primary Care Physician	<input type="text" value="-select-"/>
<input type="checkbox"/> Vaccinator	<input type="text" value="-select-"/>
<input type="checkbox"/> Program	<input type="text" value="-select-"/>
<input type="checkbox"/> Health Plan	<input type="text" value="-select-"/>
<input type="checkbox"/> State	<input type="text" value="-select-"/>
<input type="checkbox"/> County/Parish	<input type="text"/> <a href="#">Click to select</a>
<input type="checkbox"/> Zip Code	<input type="text"/>
<input type="checkbox"/> District/Region	<input type="text"/>

**Clear/Reset** **Create Export File**

**View Export Log**

**NOTE:** In this section, you have the option of including all the items or you can limit the report by selecting specific items. If you want to include all items, simply click the "Create Export File" button without using the "Limit Recall Group By" selections.

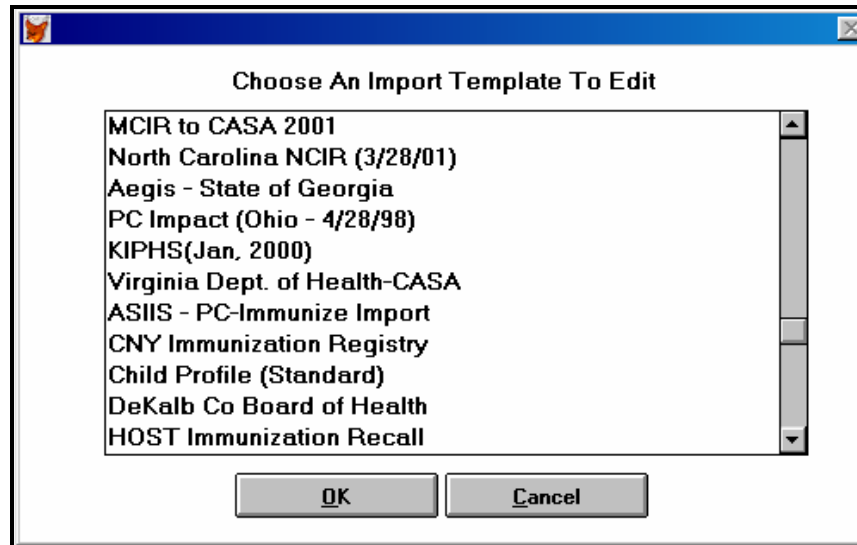

1. Select the status. The patient status window allows users to select active, inactive, or all the patients in the database assigned to the user.
2. Enter the range of birth dates for the patients you wish to export. This entry is Mandatory, as indicated by the "From" and "To" labels in red.
3. Select limiting factors. In this section, the user has choices to use in limiting the export. Keep in mind, the more the search is limited, the less information is likely to be returned.
  - a. Check the box to the left of the selection.
  - b. Select the appropriate item from the drop down menu by clicking on the arrow to the right of the field.
4. Run Export. Once all the settings are selected, click on the "Create Export File" button. One of two things is going to happen:
  - a. A "Save" window will pop up
  - b. Alternatively, it will print to the screen. If it prints to the screen, click on "File" from the menu bar and click "Save As..." and a window will appear as shown below. The name of the file does not matter; however, before you click on the "Save" button, make sure it has a ".txt" extension. Finally, remember where you save this file so you can retrieve it later using WinCASA. Instructions for editing an existing template in winCASA follow.

### 7.3 Using winCASA

Open winCASA to perform the import from the IWeb export to CASA.

1. From the start menu, go to Programs/CASA for Windows/CASA for Windows.
2. The process starts by selecting "**Assessment Site/Import/Edit existing template.**" A window opens to choose the template.

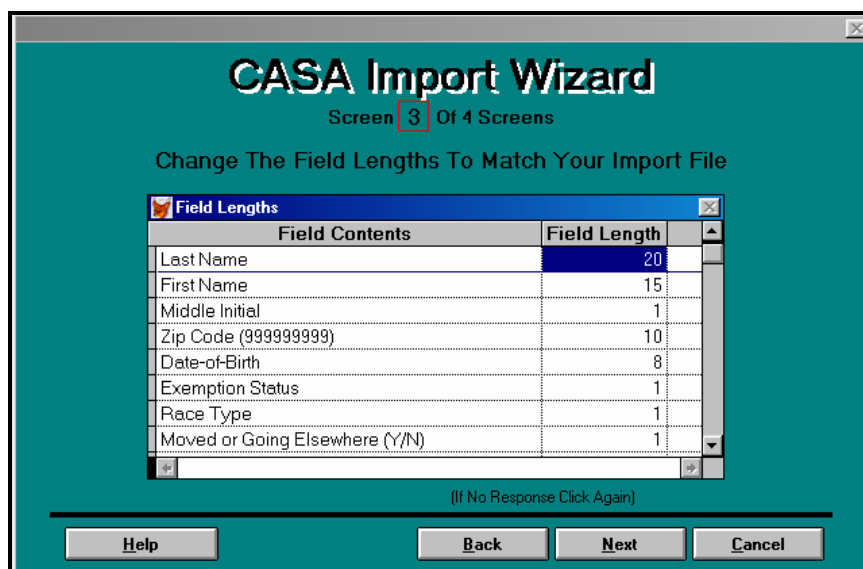

3. Choose the ASIIS PC Immunize Import template.
4. An edit wizard should open. It starts with one of five screens, even though it says four:
  - a. The first screen is used to select the existing fields to use. Skip this screen by pressing the "Next" button.

- b. The second screen is used to select the format. Select the ASCII Text, Comma-Delimited format. Click the "Next" button.

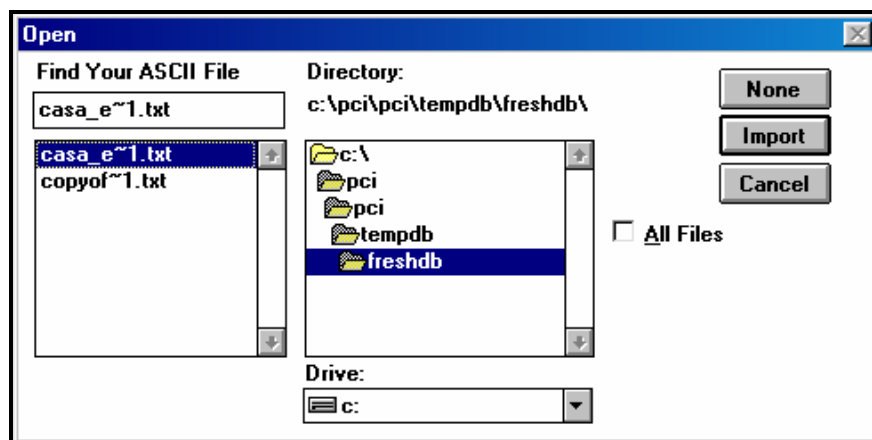

- c. The third screen is used to select the field lengths to match the import file. Skip this screen by pressing the "Next" button.

- d. The fourth screen is used to select the file that will be imported. Select the file created by the IWeb CASA Export. Click the "Import" button.

- e. The fourth screen is used to name the template. Choose a name that will be easy to remember. This only needs to be done once. Once finished, click the "Finish" button.

- f. From here, the winCASA application will be used. For more information about the winCASA application, the winCASA User's Manual can be downloaded from the CDC web site at:  
[http://www.cdc.gov/nip/casa/c\\_userguide.htm](http://www.cdc.gov/nip/casa/c_userguide.htm)

**Note:** The template for web export for CASA will be available in the next release of winCASA from the CDC.

## 8 Reminder Recall

### 8.1 Reminder Recall Basics

Reminder Recall can be used to make a report, a mailing label list, a phone list to be used with an AutoDialer, or a post card list. The purpose of these is for contacting patients about upcoming or past due vaccinations. Click on Reminder Recall from the main menu. The Reminder Recall screen will appear, as shown below.

Reminder/Recall	
<input type="checkbox"/> Do Not Increment Recall Count	
<b>Recall Date Range:</b>	<b>From:</b> 01/01/1990 <b>To:</b> 07/10/2002
<b>Maximum Recall Tries:</b>	5
<input type="checkbox"/> Include Inactive Patients	
<b>Limit Recall Group By:</b>	
<input type="checkbox"/> Patient Birth Date	From: <input type="text"/> To: <input type="text"/>
<input type="checkbox"/> Vaccinating Facility	-select-
<input type="checkbox"/> Vaccinator	-select-
<input type="checkbox"/> Physician	-select-
<input type="checkbox"/> Program	-select-
<input type="checkbox"/> Health Plan	-select-
<input type="checkbox"/> Health District/Region	<input type="text"/>
<b>Vaccine Families To Recall For:</b>	
<input checked="" type="checkbox"/> DTaP/DT/Td*	<input checked="" type="checkbox"/> HIB
<input checked="" type="checkbox"/> POLIO	<input checked="" type="checkbox"/> HEP-B 3 DOSE**
<input checked="" type="checkbox"/> MMR	<input checked="" type="checkbox"/> VARICELLA
<input checked="" type="checkbox"/> HEP-A	<input checked="" type="checkbox"/> FLU
<input checked="" type="checkbox"/> PNEUMOCOCCAL	<input checked="" type="checkbox"/> HEP-B 2 DOSE**
<b>Name of Person Running Recall:</b> <input type="text"/>	
<div>Clear All    Reset Values    Run Reminder Recall</div>	

#### 8.1.1 Do Not Increment Recall Count

When Reminder/Recall is run, typically, it will add a count to the patient record. This means that every time the patient is sent a reminder, the application keeps track of how many times it has been sent. After so many recalls, the patient will no longer be notified he/she is due for vaccinations. This checkbox is very useful for running a test recall.

#### 8.1.2 Recall Date Range

By default, the dates 01/01/1990 and the current date are already in the box. If you wish to change the recall date range, type the date range of the recall by clicking on the box next to the date. Make sure the correct date format is used: mm/dd/yyyy.

### 8.1.3 Maximum Recall Tries

You can assign the number of times to recall a patient, if they do not respond. The number is set by selecting the arrow on the drop down menu, next to the box. Click the number that you wish to set the recall tries to. Once the date and maximum recall tries are entered, move to the Limit Recall Group By area and select the criteria in which to limit your recall summary.

### 8.1.4 Limit Recall Group By

Under this section, you have the choices to use in limiting the recall. Keep in mind, the more you limit the search, less information is likely to be returned. By limiting the recall, it produces a summary of the patients who are due for immunizations by the selected fields.

**NOTE:** In this section, you have the option of including all the items or you can limit the report by selecting specific items. If you want to include all items, simply click the "Run Reminder Recall" button without using the "Limit Recall Group By" selections.

Select the criteria by clicking in the box to the left of your choice, then click on "select" to make a specific selection. In the birth date and district box, you will have to manually enter the information.

Limit Recall Group By:	
<input type="checkbox"/> Patient Birth Date	From: <input type="text"/> To: <input type="text"/>
<input type="checkbox"/> Vaccinating Facility	<input type="text" value="-select-"/>
<input type="checkbox"/> Vaccinator	<input type="text" value="-select-"/>
<input type="checkbox"/> Physician	<input type="text" value="-select-"/>
<input type="checkbox"/> Program	<input type="text" value="-select-"/>
<input type="checkbox"/> Health Plan	<input type="text" value="-select-"/>
<input type="checkbox"/> Health District/Region	<input type="text"/>

### 8.1.5 Vaccine Families To Recall

You can assign which vaccines families to recall. In the box of Vaccine Families To Recall For, is a list of available vaccine families to choose from. These are already set up in the application. Any changes to this list will need to go through your Systems Administrator. Click in the check box next to a vaccine to select or unselect from the list.

If an error has been made and you wish to select other vaccines, click on the check box and the entry will be added or removed. Repeat the steps above to re-run the reminder recall.

<i>Vaccine Families To Recall For</i>	
<input checked="" type="checkbox"/> DTaP/DT/Td*	<input checked="" type="checkbox"/> HIB
<input checked="" type="checkbox"/> POLIO	<input checked="" type="checkbox"/> HEP-B 3 DOSE**
<input checked="" type="checkbox"/> MMR	<input checked="" type="checkbox"/> VARICELLA
<input checked="" type="checkbox"/> HEP-A	<input checked="" type="checkbox"/> FLU
<input checked="" type="checkbox"/> PNEUMOCCOCAL	<input checked="" type="checkbox"/> HEP-B 2 DOSE**

### 8.1.6 Name of Person Running Recall

Enter your first and last name. This information is added to the Patient Listing report.

## 8.2 Run Reminder Recall

Once you have entered the criteria and made all your selections and choices for the search, click on the "Run Reminder Recall" button. This will open a page that allows you to choose the output options, view the criteria used in the search, and instructions on how to set up the print settings for each individual output option.

Reminder/Recall Output Select	
<a href="#">select</a>	<b>Output Type:</b>
<a href="#">select</a>	Patient Listing
	Mailing Labels (Avery 5160)
	Postcards (Avery 8387)

	<ul style="list-style-type: none"> <li>• top: 0.75"</li> <li>• bottom: 0.166"</li> <li>• left: 0.166"</li> <li>• right: 0.166"</li> </ul>
	<ul style="list-style-type: none"> <li>• top: 0.60"</li> <li>• bottom: 0.00"</li> <li>• left: 0.00"</li> <li>• right: 0.00"</li> </ul>
Postcards (Avery 8387):	<b>Internet Explorer</b>
	<b>Netscape Navigator</b>
	<ul style="list-style-type: none"> <li>• top: 0.75"</li> <li>• bottom: 0.171"</li> <li>• left: 0.18"</li> <li>• right: 0.171"</li> </ul>
	<ul style="list-style-type: none"> <li>• top: 0.60"</li> <li>• bottom: 0.00"</li> <li>• left: 0.00"</li> <li>• right: 0.00"</li> </ul>

## 8.2.1 Output Type

Reminder Recall gives you four choices for output of the information that is generated.

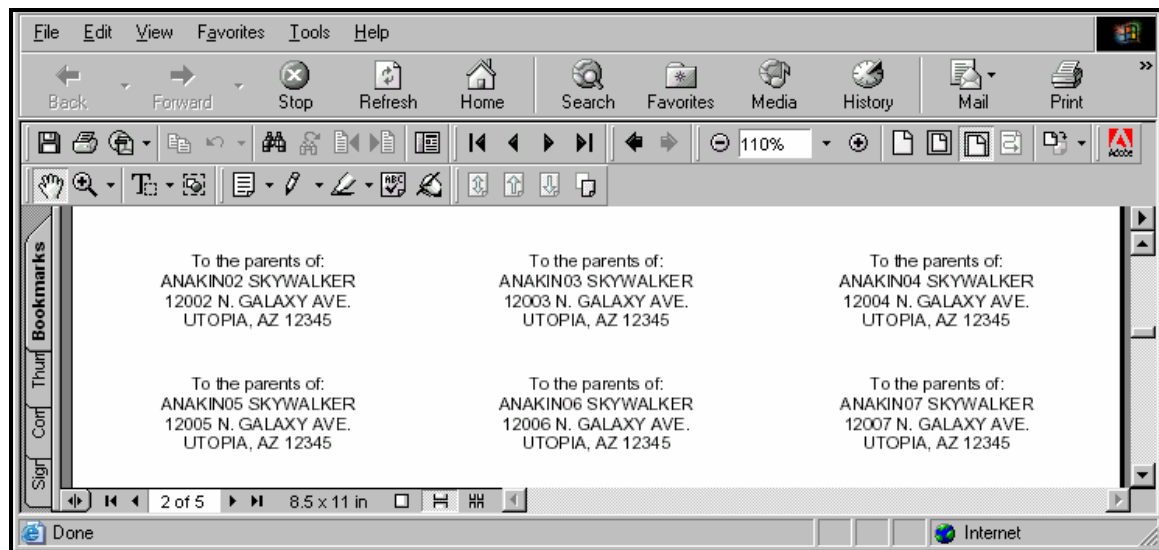

### 8.2.1.1 Patient Listing

Select Patient Listing and a report will be generated with the patient information. The screen appears as follows with all your patient names and information. Click on the "back" button on the browser to return to the Reminder Recall Output screen.

Patient Recall Group	
<b>Report Criteria</b>	<b>Report Date:</b> February 1, 2001
<b>Recall Date:</b> 02/01/2001	<b>Facility:</b> All
<b>Birth Date Range:</b> All	<b>Health Plan:</b> All
<b>Include Inactive Patients:</b> Yes	<b>Physician/Vaccinator:</b> All
<b>Person Generating Recall:</b>	<b>Program:</b> All
	<b>District Number:</b> All
<b>Vacc. Families:</b> DTaP/DT/d*, HIB, POLIO, HEP-B 3 DOSE**, MMR, VARICELLA, HEP-A, FLU, PNEUMOCOCCAL, HEP-B 2 DOSE**	
<small>* DTaP should be given to patients under 7 years old. Td should be given to patients 7 years old or older. ** If an adolescent has already begun the routine 3 dose Hep-B schedule, they should not be changed to the 2 dose schedule.</small>	
<b>Total Patients Selected:</b> 20	
<b>First Name</b>	<b>Middle Name</b>
<b>Last Name</b>	<b>Birthday</b>
<b>Guardian F.N.</b>	<b>Phone Number</b>

### 8.2.1.2 Mailing Labels (Avery 5160)

This allows you to print labels with the Patient's address so that reminders can be sent by mail. This is set up to run with Avery 5160 Mailing Labels using pdf format. After selecting Run Reminder Recall, click the Select link to display a print preview of all the patient labels. Before printing the labels, refer to the Reminder/Recall Print Settings section.

To print the labels select the print option from the browser. Click on the "back" button on the browser to return to the Reminder Recall Output screen.

### 8.2.1.3 Postcards (Avery 8387)

This allows you to print postcards with the Patient's address so that reminders can be sent by mail. This is set up to run with Avery 8387 Postcards. After selecting Run Reminder Recall, click the Select link to display a print preview of all the patient postcards. Before printing the postcards, refer to the Reminder/Recall Print Settings section.

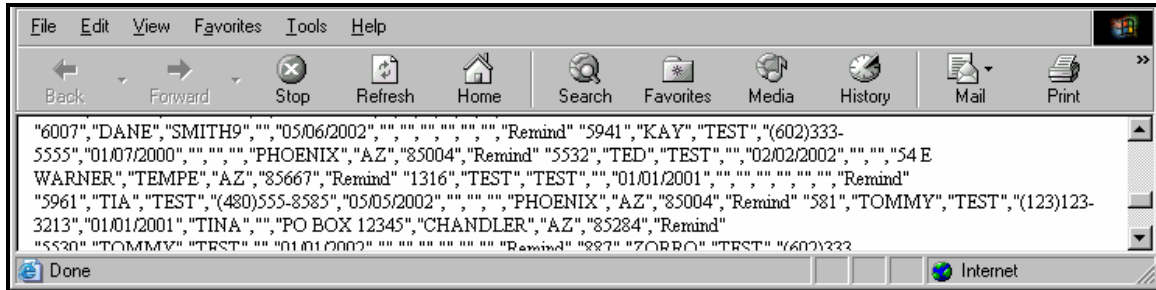

<b>ABC Immunizations</b> 123 Main Road Here, USA 10001 (888)555-1212	<b>RETURN SERVICE REQUESTED</b>  Dear Parent or Guardian,  Our records indicate that your child may be due for one or more immunizations.  Please contact the clinic to discuss scheduling an appointment for getting your child vaccinated. (If your child has been vaccinated by another provider, or is no longer a patient of this clinic, please advise so that we may update our records.)  We look forward to hearing from you soon. To print this page, select the print option from the browser. Click the "back" button on the browser to return to the Reminder Recall Output window.

### 8.2.1.4 Auto Dialer File

Select the AutoDialer File to create a file of all the patients that you would like to contact by telephone reminder. After you click on the "Run Reminder Recall" button, click the "Select" link. That should download a file to be used with Autodialer. To print this page, select the print option from the browser.

If it prints to the screen, as shown above, click on "File" from the menu bar then the "Save As" menu item. A dialog box, similar to the one below, should appear, allowing you to choose the save location and type. Make sure you save the file with a ".txt" extension.

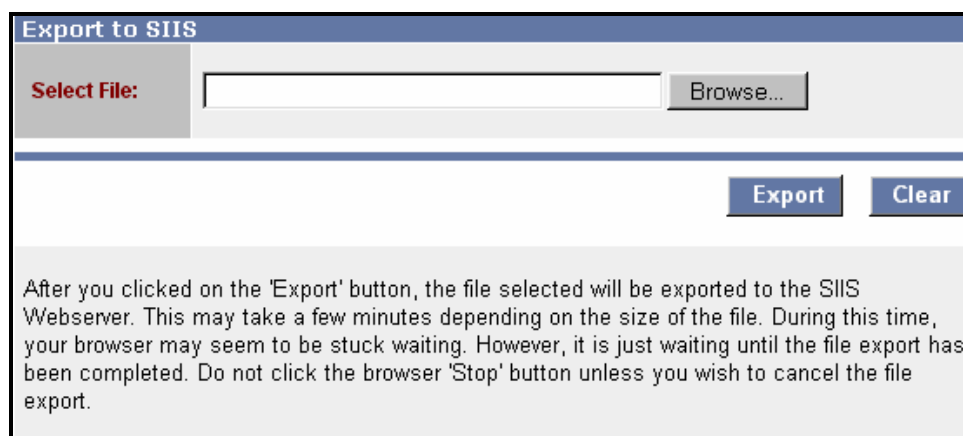

## 9 Exports Menu

### 9.1 About Exports

The Exports menu items allow users to send information directly to the registry from a patient management system, PCI2000, or other sources, as long as they meet the specific requirements for the type of export they are performing.

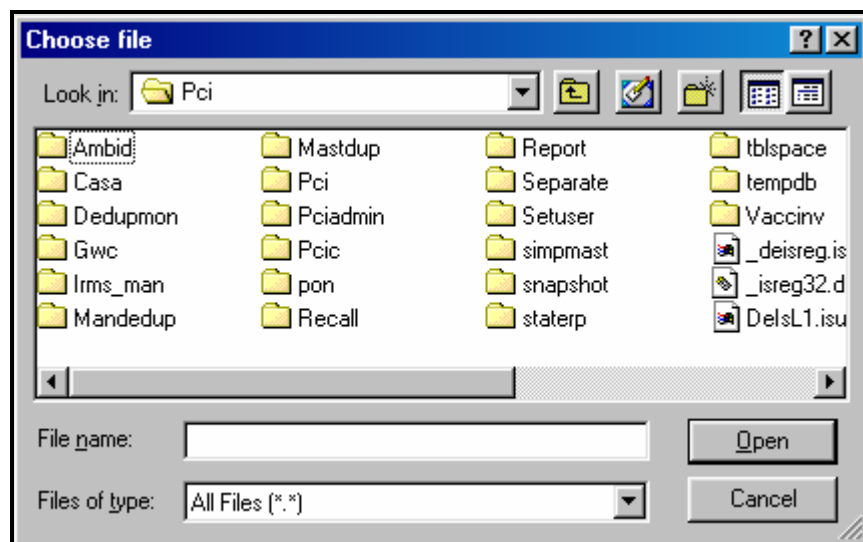

### 9.2 Exports Menu - HL7/SIIS

To upload a file, click the browse button to find the file.

The screenshot shows a dialog box titled "Export to SIIS". It has a "Select File:" label next to a text input field, with a "Browse..." button to the right. Below the input field, there are two buttons: "Export" and "Clear". At the bottom of the dialog, there is a paragraph of text: "After you clicked on the 'Export' button, the file selected will be exported to the SIIS Webserver. This may take a few minutes depending on the size of the file. During this time, your browser may seem to be stuck waiting. However, it is just waiting until the file export has been completed. Do not click the browser 'Stop' button unless you wish to cancel the file export."

Once you click the "Open" button, you will be returned to the export screen in the IWEB application. Next, click the "Export" button to send the file to be processed by the Registry personnel.

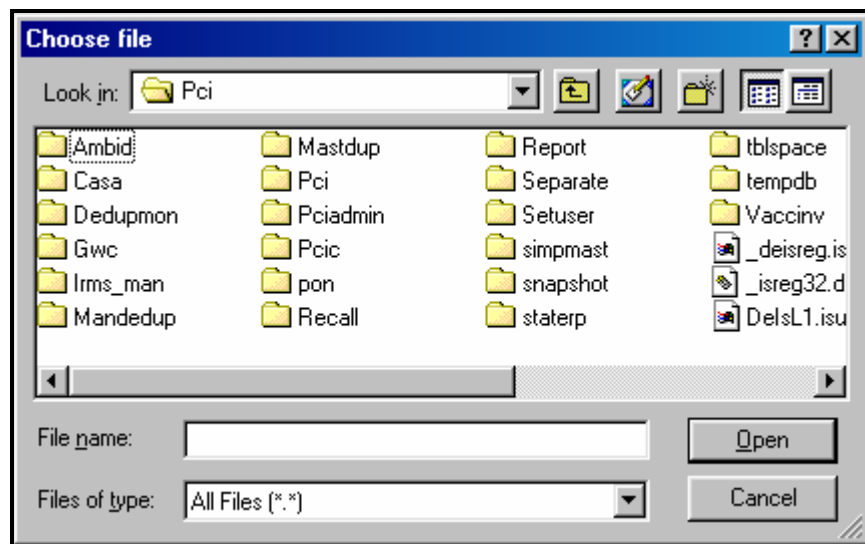

### 9.3 Exports Menu - DTT

To upload a file, click the browse button to find the file.

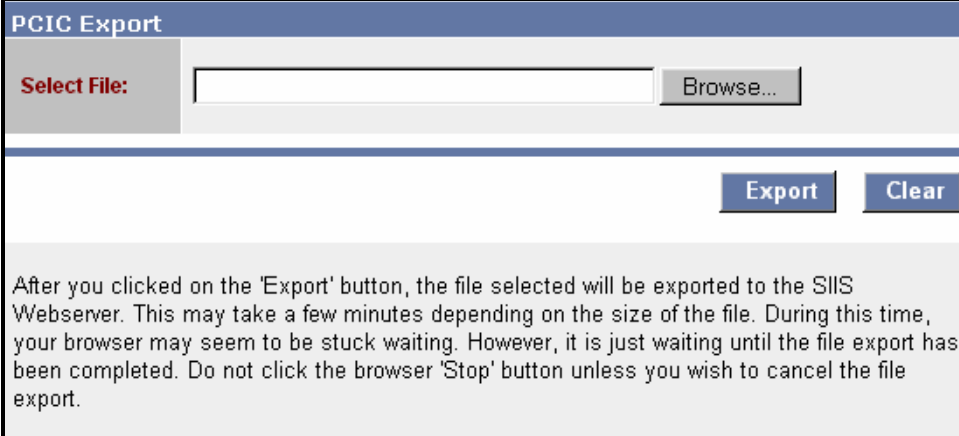

The screenshot shows a dialog box titled "IDT Export". It has a "Select File:" label next to a text input field, with a "Browse..." button to its right. Below the input field, there are two buttons: "Export" and "Clear". At the bottom of the dialog, there is a paragraph of text: "After you clicked on the 'Export' button, the file selected will be exported to the SIIS Webserver. This may take a few minutes depending on the size of the file. During this time, your browser may seem to be stuck waiting. However, it is just waiting until the file export has been completed. Do not click the browser 'Stop' button unless you wish to cancel the file export."

Once you click the "Open" button, you will be returned to the export screen in the IWEB application. Next, click the "Export" button to send the file to be processed by the Registry personnel.

## 9.4 Exports Menu - PCIC

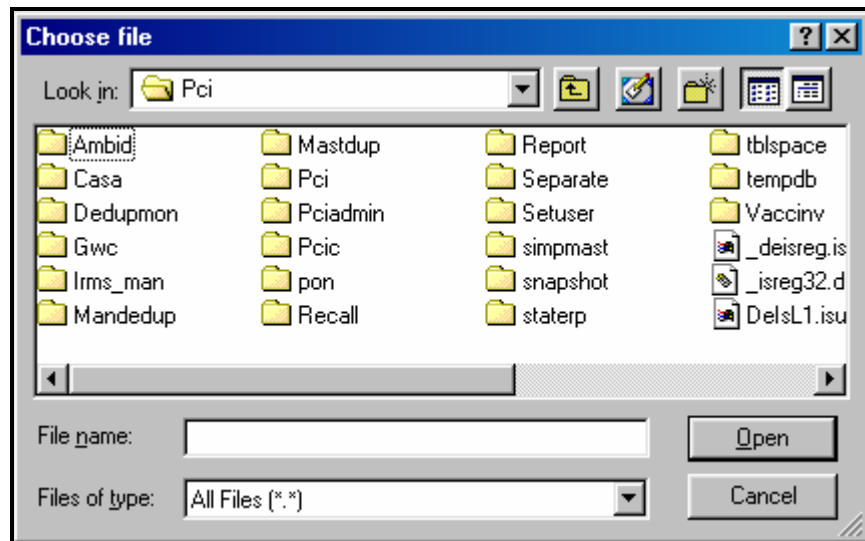

To upload a file, click the browse button to find the file.

The PCIC Export dialog box features a title bar with the text "PCIC Export". Below the title bar, on the left, is a label "Select File:" in red text. To its right is a text input field. Further right is a "Browse..." button. Below these elements, on the right side of the dialog, are two buttons: "Export" and "Clear". At the bottom of the dialog, there is a block of instructional text.

After you clicked on the 'Export' button, the file selected will be exported to the SIIS Webserver. This may take a few minutes depending on the size of the file. During this time, your browser may seem to be stuck waiting. However, it is just waiting until the file export has been completed. Do not click the browser 'Stop' button unless you wish to cancel the file export.

Once you click the "Open" button, you will be returned to the export screen in the IWEB application. Next, click the "Export" button to send the file to be processed by the Registry personnel.

## 10 UFM - User Feedback Module

The Feedback System is an automated administrative tool that provides summary statistics to clients submitting data to a central registry, and creates management reports for registry administration. The Feedback System has the ability to disseminate these reports by facsimile or electronic mail. This feedback consists of statistics on records submitted by providers. The UFM provides the following information to administrator, as well as providers and users.

User Scheduled Tasks			
Name:	Schedule:	Next Run Time:	
			<a href="#">Add Task</a>

### 10.1 Daily Status Report

Daily Status Report task generates a daily snapshot of the basic statistics of the registry. The Daily Status Report configuration page allows the user to select the IRMS' and facilities that the Daily Status Report should be emailed to. The other box allows the user to enter in additional email addresses separated by commas.

Daily Status Report	
July 11, 2002	
Cumulative Totals	
Patients in registry	1146
Ages 0 - 11 months	92
Ages 12 - 23 months	225
Ages 24 - 35 months	156
Ages 35 - 59 months	127
Ages 60 - 71 months	12
Ages 6 - 18 years	366
Ages > 18 years	168
Patients in registry without vaccinations	957
Vaccinations	1271
Sites (Total)	13
Sites (Public)	0
Sites (Private)	0
Previous Day Totals	
Patients added to registry	0
Vaccinations added to registry	0
Sites submitting	0

## 10.2 Weekly Status Report

Weekly Status Report task generates a weekly snapshot of the basic statistics of the registry. The Weekly Status Report configuration page allows the user to select the IRMS' and facilities that the Weekly Status Report should be emailed to. The other box allows the user to enter in additional email addresses separated by commas.

Weekly Status Report	
July 5, 2002 to July 11, 2002	
Cumulative Totals	
Patients in registry	1146
Ages 0 - 11 months	92
Ages 12 - 23 months	225
Ages 24 - 35 months	156
Ages 35 - 59 months	127
Ages 60 - 71 months	12
Ages 6 - 18 years	366
Ages > 18 years	168
Patients in registry without vaccinations	957
Vaccinations	1271
Sites (Total)	13
Sites (Public)	0
Sites (Private)	0
Previous Week Totals	
Patients added to registry	8
Vaccinations added to registry	0
Sites submitting	2

## 10.3 Bad Login Report

The Bad Login Report is part of the Security Module and works in a couple of different ways. First, it keeps track of any "Bad Login". For example, if a user enters a wrong password, this report will keep track of it. Second, it keeps track of any user trying to login before or after the login times set up by the SIIS registry administrator. For example, in the Administrator Settings, if the times set up are 8:00 am and 4:00 pm, anyone trying to login outside those two times will be recorded in the Bad Login Report.

IWeb Security Module - Bad Login Attempts			
From: 07/12/2002 00:00 To: 07/12/2002 15:16			
User Name Attempted	Password Attempted	Login Error	Time/Date Stamp
ADMIN1	ADMIN!	INVALID LOGIN NAME OR PASSWORD	07/12/2002 11:24
ADMIN1	null	LOGIN TIME OUTSIDE OF NORMAL HOURS	07/12/2002 11:25
ADMIN1	null	LOGIN TIME OUTSIDE OF NORMAL HOURS	07/12/2002 12:28
ADMIN1	null	LOGIN TIME OUTSIDE OF NORMAL HOURS	07/12/2002 13:01
ADMIN	ADMIN	INVALID LOGIN NAME OR PASSWORD	07/12/2002 13:46

## 10.4 Data Quality Report

The Data Quality report is a report that shows a breakdown of patients and shots by IRMS. It lists how many particular data elements are missing for each category and what the percentage is of the total records.

GENERAL HOSPITAL (TEST) 1001	
<b>Patient Data Quality</b>	
There are 260 patient(s) associated with this IRMS.	
The following shows the percent and number of data elements that are missing.	
Address	
Street	59% (154)
City	39% (101)
State	33% (85)
Phone	60% (156)
Gender	76% (198)
Mothers Maiden Name	48% (125)
Guardian First Name	60% (155)
Guardian Middle Name	93% (241)
Guardian Last Name	88% (228)
County	57% (149)
District	54% (141)
The following shows the percent and number of data elements that are present.	
Inactive Code	
Delivery Unsuccessful	0% (1)
Other	2% (4)
Address Incorrect	1% (2)
Active	97% (253)
VFC Eligibility	
KidsCare	9% (23)
Underinsured	3% (8)
Medicaid	12% (30)
Nat. Amer.or Alaskan	4% (11)
Hoosier Hwise Pkg C	6% (16)
Uninsured	8% (20)
Unspecified	58% (152)
<b>Vaccination Data Quality</b>	
There are 852 vaccination(s) associated with this IRMS.	
The following shows the percent and of data elements that are null.	
Lot Number	77% (659)
Manufacturer	77% (659)
Vaccinator	95% (808)
District	72% (613)

The Add Scheduled Tasks page is used to name, schedule, and select the task to run. A name must be assigned to the task. Fill out or complete the appropriate boxes then click the Next button.

User Scheduled Tasks			
Name:	Schedule:	Next Run Time:	
<b>Add Scheduled Tasks</b>			
Task Name:	<input type="text"/>		
Minute:	:00 ▾		
Hour	12 A.M. ▾		
Day of Month:	▾		
Month	▾		
Day of Week	▾		
Year:	▾		
Task:	Vaccine Administered Report ▾		
			<input type="button" value="Cancel"/> <input type="button" value="Next"/>

A screen similar to the one below will appear. Finish filling in the appropriate text boxes. Click the Add button.

User Scheduled Tasks

Person Completing Report:	<input type="text"/>		
Phone Number:	<input type="text"/>		
			<input type="button" value="Cancel"/> <input type="button" value="Add"/>

Once the user has finished adding the task, it will appear in the User Scheduled Tasks screen as shown below.

User Scheduled Tasks			
Name:	Schedule:	Next Run Time:	
<a href="#">VAR</a>	12:00 AM every day	12:00 AM 1/31/2002	<a href="#">Delete</a>
			<input type="button" value="Add Task"/>

# 11 Help Menu

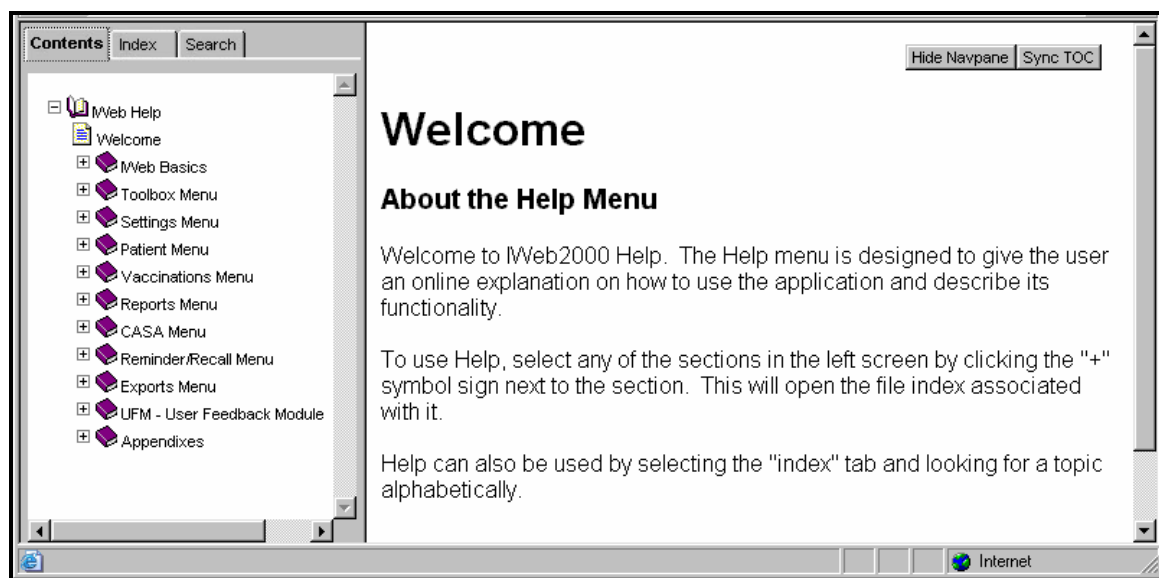

## 11.1 About the Help Menu

The Help menu is designed to give the user an online user guide that will explain how to use the application and describe its functionality.

To use, click on the Help link in the menu. A screen will appear similar to the one below.

From here, if the user knows the section of help needed, they can select the section in the left screen by clicking the "plus" sign next to the section.

Selecting the "index" tab and looking for a topic alphabetically can also be useful with help.

## A. Appendix - Inactivating Records

The PCI Web Application helps you manage all aspects of your patient immunization information, including certain things that need special handling. Sometimes you may have a record in your database that you may want to inactivate for certain reasons.

### **Inactivating a Record**

In the web application, you cannot delete patient records. The reason you cannot delete them is that other records in the system reference them. However, you can inactivate them, which means they won't show up in searches. The reason to inactivate the record is to save the information you already entered. Inactivating a record removes it from consideration when you conduct the Immunization Assessment. Nevertheless, it keeps the record in your database, in case the patient returns and you want access to the information again.

In the middle, right side of the Patient Demographic screen, there is an Inactive Code field. There are seven codes from which to choose. These codes apply primarily to public health departments who are trying to assure that the patients in their databases are really theirs. Private clinics can define their own inactivation criteria, but the web application codes remain the same.

If reliable information has been received that the patient has died, use this code:

- Deceased

If you send a reminder postcard and receive notice back from the Postal Service, inactivate the record for the specified reason:

- Postal Forward Order Expired
- No Postal Order on File
- Moved--Left No Address

If you get the following notices from the Postal Service, make sure the incorrect address is not a result of improper information entry. Verify the address through the phone book or directory assistance. If you cannot, you may inactivate the record for any of the following:

- Attempted Not Known
- Delivery Unsuccessful
- Address Incorrect

The final category is a generic catchall, which gives you the flexibility to inactivate for:

- Other

*This broad category should only be used with proper documentation.* Reasons could include a record received from a hospital with the first dose of *Hep b* for a child who has never been seen by the health department, a child who resides in Mexico, or documentation that the child is in the care of another health care provider.

## B. Appendix - State Reports

The state reports are a set of customizable reports that apply only to the specific needs of a particular state. Indiana State Reports allows a user to print a Blank Vaccine Signature Form, an Immunization Signature Form, a Doses Administered report, a Daily Patient Immunization List, or a Shot Record Card.

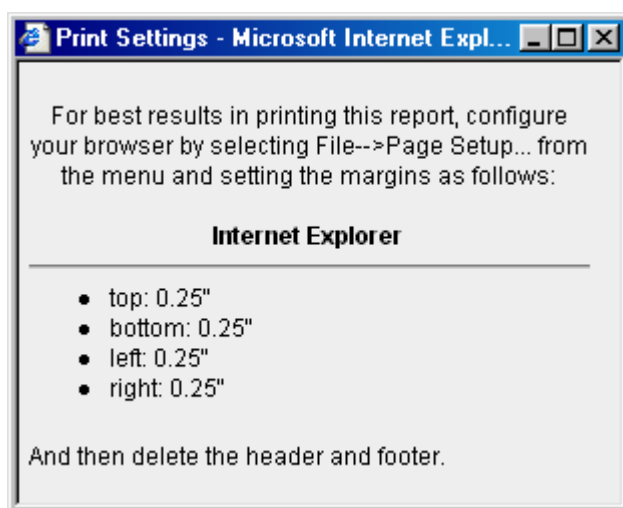

State Reports	
Patients	Vaccinations
Blank Vaccine Signature Form	<a href="#">Doses Administered</a>
<a href="#">Page 1</a>	<a href="#">Daily Patient Immunization List</a>
<a href="#">Page 2</a>	
Immunization Signature Form	
<a href="#">Page 1</a>	
<a href="#">Page 2</a>	
Shot Record Card	

### B.1. Immunization Signature Forms

The Blank Vaccine Signature Form and the Immunization Signature Form are the same. The only difference is, the Immunization Signature Form is populated by patient and immunization information. In order to access the populated form, the user must complete a patient search from the Patient Search screen, and select a patient.

When the user selects the State Reports from the reports menu, the [hyperlink](#) to the Immunization Signature Form will be available.

When the user clicks on the Page 1 link, the following message window will appear. This window describes the browser settings that are necessary to print the form.

Behind the printer settings window, in the main screen of the browser, Page 1 of the

selected report will appear with certain fields populated with patient information.

VACCINE ADMINISTRATION RECORD OF PARENT/GUARDIAN OR RECEIPT SIGNATURE					
<small>I have read or had explained to me the information in the "Vaccine Information Statement(s)" or the "Important Information Statement(s)" for the disease(s) and vaccine(s) checked below. <b>AUTHORIZATION FOR RELEASE OF IMMUNIZATION INFORMATION</b>					
<small>By signing below, I authorize</small>			<small>STATE HEALTH DEPARTMENT</small>		
<small>to release to or to request from schools, day care centers, state/local health departments and health care providers all immunization information relating to the above Patient. The purpose of receiving/releasing this information is to monitor that the above patient receives all further immunizations. This information will be utilized for follow-up services provided by schools, day care centers, state/local health departments and health care providers to the above patient, and may be released or received by oral communication, in written form, or by computer. I understand that I may revoke this authorization at any time in writing, but the request shall remain valid until revoked. This will terminate upon completion of childhood immunization series. A photocopy of this authorization has the same effect as an original.</small>					

Page 2 is a detail of the patient's vaccinations received for the day selected. When the user clicks on Page 2 of the report, a screen will appear asking the user to select a date for the report. By default, the date will be Today's date. Click on the Print button to view the report.

The Shot Record Card is a patient copy of the vaccinations received over the patient's lifetime. This report is only available after a patient search has been completed and a patient's record has been selected. To use this report, click on the Shot Record Card [hyperlink](#). The following report will appear in the browser. Print this record using the yellow cards provided by the state.

The Doses Administered Report is a report that displays the number of doses given

within a certain date range, to a selected age range of patients. The report can also be limited by selected a funding source and/or a vaccinating facility.

To use this report, first click on the Doses Administered [hyperlink](#). Enter the date range of the vaccine dates. Next, select the age range of the patients. If no selections need to be made regarding the funding source or vaccinating facility, click the Create Report button.

Doses Administered Report	
<b>Limit Report by</b>	
Vaccine Date Range:	From <input type="text"/> To <input type="text"/>
<input checked="" type="radio"/> Age Range:	Less than 1 year, 1-2 years, 3-5 years, 6 years, 7-10 years, 11-12 years, 13-18 years, 19+
<input type="radio"/> Age Range:	Less than 3 months, 3-5 months, 5-7 months, 7-12 months, 1-2 years, 2+ years
<input type="checkbox"/> Funding Source:	<input type="text" value="-select-"/>
<input type="checkbox"/> Vaccinating Facility:	<input type="text" value="-select-"/>
<input type="button" value="Create Report"/> <input type="button" value="Clear"/>	

Once the settings are entered click on the Create Report button. A screen similar to the one below will appear. To print the report, select the print options in the browser. Once finished with the report, click the "back" button on the browser to return to the IWeb2000 application.

#### B.4. Daily Patient Immunization List

The Daily Patient Immunization List is a report that will display all the vaccinations given on a certain date. These are reported using the IRMS ID the user is assigned to. The list can also be filtered by facility.

To use, enter the date. Select a facility and click the Create Report button, or just click the Create Report button.

Daily Patient Immunization List	
<b>Limit Report By</b>	
Begin Date (Shots Given on this Date):	<input type="text"/>
<input type="checkbox"/> Facility	-select-
<b>Create Report</b>	

Once the Create Report button is clicked, a similar screen will appear listing all the patients who received vaccinations for the date chosen, their birth date, vaccines they received, the dose number and what facility. To print this report, select the print options from the browser.

Daily Patient Immunization List				
Report Criteria			Report Date: March 29, 2002	
Begin Date (Shots Given on this Date): 02/02/2002				
Facility: All				
Total Number of Vaccines Given: 7				
Total Number of Patients: 4				
Patient Name	Birth Date	Vaccine	Dose	Facility
CLARK, KENYATTA ANTONIO	06/23/1975	DTP - unspecified	2	TEST

TEST, TOMMY	01/01/2001	Hib--unspecified	1	COWABUNGA CLINIC

## C. Appendix - Management Reports

### C.1. Reports Menu - Management Reports

The Management Report Module is also a customizable reporting tool for upper level managers to reflect immunization rates, to make assessments on the data, or to recall patients throughout an IRMS, county, region, state, etc. This is just a sample of some features that can be included.

Management Report Module								
Management reports return data from the entire registry, and are therefore not limited to servicing IRMS or Facility.								
Therefore, it is important that the user put limitations on these reports to avoid returning unreasonably large results.								
Management Reports								
CASA Export								
Reminder Recall								
Management Maps								
Immunization Type and Number of Vaccinations								
Report #	Criteria	DTP	OPV	HEPB	HIB	MMR	Varicella	Age Range of Interest
1	Meets	3	2	3	3			7-15 months
2	Meets	3						Before 9 months
3	Meets	4						Before 18 months
4	Under	3	2	2	2			12-23 months
5	Meets	4	3			1		15-24 months
6	Meets	4	3		3	1		15-24 months
7	Meets	4	3	3	3	1		15-24 months
8	Meets	4	3	3	3	1	1	15-24 months
9	Under	4	3			1		24-35 months
10	Under	4	3	3	3	1	1	24-35 months
11	Meets	4	3	3	1	1	1	24-35 months
12	Under			<2				4-60 months
13	Under	3	2	2	2			9-60 months
14	Under	<3						9-60 months
15	Under	4	3			1		18-60 months
16	Under						0	18-60 months
17	Under	4						18-60 months
18	Under	4	3		3	1		18-60 months
19	Under					1		18-60 months
20	Meets	5	4			2		48-72 months
21	Meets					2		48-72 months

### C.1.1. CASA Export

To conduct an immunization assessment, the Web Application uses an export feature called Export to CASA, the Clinic Assessment Software Application. CASA is a separate software package that has been developed by the Centers for Disease Control and Prevention to assess immunization coverage rates in a standard manner.

From the Management Reports main screen select CASA Export. This will bring up the CASA Export screen as shown below. This CASA Export feature is similar to the normal CASA Export except that it does contain the limit export by facility or physician/vaccinator.

To use, make the appropriate choices and fill in the appropriate boxes. Once all the selections are made, click on the Create Export File button.

Management Report Module	
Export to CASA	
Patient Status:	<input checked="" type="radio"/> Active Only <input type="radio"/> Inactive Only <input type="radio"/> All
Patient Birthday Range:	From: <input type="text"/> To: <input type="text"/>
Limit Export by:	
<input type="checkbox"/> Program:	<input type="text" value="-select-"/>
<input type="checkbox"/> Health Plan:	<input type="text" value="-select-"/>
<input type="checkbox"/> State:	<input type="text" value="-select-"/>
<input type="checkbox"/> County/Parish:	<input type="text"/> <a href="#">Click to select</a>
<input type="checkbox"/> Zip Code:	<input type="text"/>
<input type="checkbox"/> District/Region:	<input type="text"/>
<input type="button" value="Clear/Reset"/> <input type="button" value="Create Export File"/>	

In order for you to use this data with CASA, you will need to save this output as a text file. At the browser menu please Select:

- File
- Save As
- The "SAVE WEB PAGE" dialog box will appear
- Filename: Please type in *anyfilename.txt*
- Save As Type: Please select Text File (\*.txt)
- Then Click Save

### C.1.2. Reminder Recall

The Management Reminder Recall can be used to make a report or a mailing label list. The purpose of these is for contacting patients about upcoming or past due vaccinations. Click on Reminder Recall from the Management Reports main screen. The Reminder Recall screen will appear, as shown below.

This Reminder Recall feature is similar to the normal Reminder Recall except that it does not contain the limit recall group by vaccinating facility or physician/vaccinator. Additionally, it has a few other options to limit recall group by, like State, County/Parish, or Zip Code.

Management Report Module	
Reminder/Recall	
Recall Date	02/14/2002
Maximum Recall Tries	5
<input type="checkbox"/> Include Inactive Patients	
Limit Recall Group By	
<input type="checkbox"/> Patient Birth Date:	From: <input type="text"/> To: <input type="text"/>
<input type="checkbox"/> Program:	-select-
<input type="checkbox"/> Health Plan:	-select-
<input type="checkbox"/> State:	-select-
<input type="checkbox"/> County/Parish:	<input type="text"/> <a href="#">Click to select</a>
<input type="checkbox"/> Zip Code:	<input type="text"/>
<input type="checkbox"/> District/Region:	<input type="text"/>
Vaccine Families To Recall For	
<input checked="" type="checkbox"/> DTaP/DT/Td*	<input checked="" type="checkbox"/> HIB
<input checked="" type="checkbox"/> POLIO	<input checked="" type="checkbox"/> HEP-B 3 DOSE**
<input checked="" type="checkbox"/> MMR	<input checked="" type="checkbox"/> VARICELLA
<input checked="" type="checkbox"/> HEP-A	<input checked="" type="checkbox"/> FLU
<input checked="" type="checkbox"/> PNEUMOCOCCAL	<input checked="" type="checkbox"/> HEP-B 2 DOSE**
Name of Person Running Recall: <input type="text"/>	
Output Type: <input checked="" type="radio"/> Patient Listing <input type="radio"/> Mailing Labels (Avery 5160)	
<a href="#">Run Reminder Recall</a>	

To use, make the appropriate choices and fill in the appropriate boxes. Once all the selections are made, click on the Run Reminder Recall button. The screen similar to the one below will appear. Once you view or print the report, click the "back" button on your browser.

Patient Recall Group					
Report Criteria			Report Date: February 14, 2002		
Recall Date: 02/14/2002			Program: All		
Birth Date Range: All			Health Plan: All		
Include Inactive Patients: Yes			State: All		
Person Generating Recall: kevin			County: All		
			District Number: All		
			Zip: All		
Vacc. Families: DTaP/DT/Td*, Hib, Polio, Hep-B 3 Dose**, MMR, Varicella, Hep-A, Flu, Pneumococcal, Hep-B 2 Dose**					
* DTaP should be given to patients under 7 years old. Td should be given to patients 7 years old or older.					
** If an adolescent has already begun the routine 3 dose Hep-B schedule, they should not be changed to the 2 dose schedule.					
First Name	Middle Name	Last Name	Birthday	Guardian F.N.	Phone Number
JOHN	ANDERSON	DOE	01/01/1999	LAURA	
Vaccine Family Name		Dose Number	Recommended Date		Minimum Date
HEP-B 3 DOSE**		1	01/01/1999		01/01/1999
PNEUMOCOCCAL		1	03/01/1999		02/12/1999

### C.1.3. Management Maps

By clicking on any of the hyperlinks associated with the report number, the user will be taken to a GIS mapping screen.

Management Maps								
ImmunizationType and Number of Vaccinations								
Report #	Criteria	DTP	OPV	HEPB	HIB	MMR	Varicella	Age Range of Interest
1	Meets	3	2	3	3			7-15 months
2	Meets	3						Before 9 months
3	Meets	4						Before 18 months
4	Under	3	2	2	2			12-23 months
5	Meets	4	3			1		15-24 months
6	Meets	4	3		3	1		15-24 months
7	Meets	4	3	3	3	1		15-24 months
8	Meets	4	3	3	3	1	1	15-24 months
9	Under	4	3			1		24-35 months
10	Under	4	3	3	3	1	1	24-35 months
11	Meets	4	3	3	1	1	1	24-35 months
12	Under			<2				4-60 months
13	Under	3	2	2	2			9-60 months
14	Under	<3						9-60 months
15	Under	4	3			1		18-60 months
16	Under						0	18-60 months
17	Under	4						18-60 months
18	Under	4	3		3	1		18-60 months
19	Under					1		18-60 months
20	Meets	5	4			2		48-72 months
21	Meets					2		48-72 months

With this mapping screen the user has many options to manipulate the data.

## D. Appendix - User Information Access

### D.1. IWeb User Access Levels

The enrolled users are set up at the registry level by using the Web User Maintenance window, in PCI Administrator from PCI2000. There are six levels of user access to the Registry through this mode, which are explained below in the table.

<b>Access Type</b>	<b>Registry View</b>	<b>IRMS Client</b>	<b>IRMS View</b>	<b>Facility Client</b>	<b>Facility View</b>	<b>Vendor View</b>
VIEW PUBLIC DATA	Y	Y	Y	Y	Y	
VIEW PRIVATE DATA		Y	Y	Y	Y	
ADD / EDIT PATIENTS		Y		Y		
ADD / EDIT VACCINATIONS		Y		Y		
DELETE VACCINATIONS		Y		Y		
USE TOOLBOX		Y		Y		
RUN REPORTS		Y		Y	Y	
LIMIT REPORTS BY FACILITY				Y	Y	
UPLOAD FILES		Y		Y		Y
DOWNLOAD FILES		Y		Y		
RUN CASA EXPORT		Y		Y		
RUN REMINDER / RECALL		Y		Y		

## **D.2. Patient Information Ownership**

Public information means the information can be view by all.

Private information means the information can be view by those who "**own**" the record. Which means they were the last to edit the record, or they added the record? Here is a brief overview of how public and private information differ.

Each "record" is divided into 2 separate records:

- Demographics
- Vaccinations

### **D.2.1. Patient Demographic Information - Public**

The following information is public. Any user can view this information after performing a search for a patients record.

<b>Patient First Name</b>	<b>Patient Middle Name</b>
<b>Patient Last Name</b>	<b>Patient Suffix</b>
<b>Patient Birthdate</b>	<b>Patient Gender</b>
<b>Inactive Status/Reason</b>	<b>Guardian First Name</b>
<b>Guardian Middle Name</b>	<b>Guardian Last Name</b>
<b>Physician Name</b>	<b>Health Plan</b>
<b>Programs</b>	<b>Facility</b>
<b>VFC Status (flag only -- 'eligible' or 'not eligible')</b>	

### **D.2.2. Patient Demographic Information - Private**

The following information is private. User's can view this information only if they own it.

<b>Patient SSN</b>	<b>Patient Language</b>	<b>Patient Ethnicity</b>
<b>Patient Race</b>	<b>Patient Address</b>	<b>Patient Phone Number</b>
<b>Patient Email Address</b>	<b>VFC Eligible Reason</b>	<b>Guardian SSN</b>
<b>Mother's Maiden Name</b>	<b>Medicaid Number</b>	<b>Birth File Number</b>
<b>Chart Number</b>	<b>Health Plan ID</b>	<b>Health Plan Enroll Date</b>
<b>Comments</b>	<b>Next Appointment Date</b>	

**NOTE:** Regardless of patient record ownership, the user will always see every single vaccination.

#### **D.2.3. Patient Vaccination Information - Public**

The following information is public. Any user can view this information after performing a search for a patients record.

<b>Vaccine Type</b>	<b>Vaccination Date</b>
<b>Historical</b>	<b>Vaccinator</b>
<b>Facility</b>	<b>Adverse Reaction (flag only -- 'Adverse Reaction occurred')</b>
<b>Contraindication (flag only)</b>	

#### **D.2.4. Patient Vaccination Information - Private**

The following information is private. User's can view this information only if they own it.

<b>Manufacturer</b>	<b>Lot Number</b>
<b>VFC Status</b>	<b>Anatomical Site</b>
<b>Adverse Reaction</b>	<b>Contraindication</b>

## ***Glossary of Terms***

<b><u>Demographic</u></b>	Refers to information such as address, sex, age, phone number, etc.
<b><u>Facility Client</u></b>	Add/Edit rights. Private fields can only be edited or viewed if entered by self or someone entering under the same facility. User must be assigned IRMS and facility ID's.
<b><u>Facility View</u></b>	View only rights. Some reports must be limited to assigned facility. Private fields are only viewable if entered by self or someone entering under the same IRMS. User must be assigned IRMS and facility ID's.
<b><u>IRMS</u></b>	Immunization Record Management System.
<b><u>IRMS Client</u></b>	Add/Edit rights. Private fields can only be edited or viewed if entered by self or someone entering under the same IRMS. User must be assigned an IRMS ID.
<b><u>IRMS View</u></b>	View only rights. Private fields are only viewable if entered by self or someone entering under the same IRMS. User must be assigned an IRMS ID.
<b><u>IWeb2000</u></b>	The Internet version of SIIS. It provides patient immunization resource management and administration tools that work together to help graphically perform patient immunization management tasks.
<b><u>PCI2000</u></b>	The desktop version of SIIS. The desktop version can be used with all the same functionality as <b>IWeb2000</b> and is used for administrative purposes.
<b><u>Registry View</u></b>	View only rights. The user does not have access to private information and does not have to be assigned an IRMS ID.
<b><u>SIIS</u></b>	State Immunization Information System.
<b><u>Vendor View</u></b>	Upload files only. This feature allows a vendor to log into the web application and send file exports from the Patient Management Systems.

# Patient Chargeable Status for Vaccinations Given

Last Updated on 5/1/02
